

100 bonus depreciation power systems

Overview

Bonus depreciation allows an investor to recognize 100% of the depreciation in the same tax year the system is placed in service. Currently, in 2022, the basis of depreciation of qualifying solar equipment is 87% - there is 13% deducted from the overall project costs to account for half of the ITC. When did bonus depreciation phase out?

The 100% bonus depreciation phased out after 2022, with qualifying property getting only a 60% bonus deduction in 2024 and less in later years. One of the most significant provisions of the Tax Cuts and Jobs Act (TCJA) was increased bonus depreciation for qualified property placed into service between Sept. 28, 2017, and Dec. 31, 2026.

What is bonus depreciation & how does it work?

The 2017 tax law (Tax Cuts and Jobs Act, or TCJA) permitted a 100 percent bonus depreciation deduction for assets with useful lives of 20 years or less. Bonus depreciation, however, was enacted on a temporary basis and is scheduled to drop by 20 percentage points per year beginning in 2023 until it fully phases out after the end of 2026.
