

# 18 Root Canal Solar Support

## Overview

---

Why do I need a root canal?

There are several reasons for this. One is that, in most cases, a root canal treatment determines the ultimate salvageability of the tooth and whether a proper restoration can be placed without compromising the integrity of the tooth. The second reason is the ease of treatment.

What is root canal treatment (endodontics)?

Root canal treatment (endodontics) is a dental procedure used to treat infection at the centre of a tooth. Root canal treatment is not painful and can save a tooth that might otherwise have to be removed completely. The infection at the centre of a tooth (the root canal) is caused by bacteria that live in the mouth and invade the tooth.

Can a root canal save a tooth?

Root canal treatment is not painful and can save a tooth that might otherwise have to be removed completely. The infection at the centre of a tooth (the root canal) is caused by bacteria that live in the mouth and invade the tooth. This can happen after: A tooth is made up of 2 parts.

What is a root canal treatment?

A root canal treatment is a common dental procedure that saves a severely damaged tooth. The most common reasons for needing a root canal are: A root canal involves removing inflamed and infected soft tissue from the hollow internal chamber of the tooth. This reduces the risk of worsening problems that can lead to tooth extraction.

Is root canal treatment safe?

Research overwhelmingly proves that root canal treatment is safe, effective and eliminates pain. The American Association of Endodontists's Root Canal Safety page provides further resources about the safety of endodontic

treatment. How many appointments are necessary for root canal treatment?

.

How long does endodontic (root canal) treatment last?

Teeth that have had endodontic (root canal) treatment can last as long as natural teeth, however, in some cases the treatment can fail or symptoms can persist. This may happen shortly after the treatment has been performed or even years following the treatment.
