

# 20kw off grid solar system price

## Overview

---

As of January 2022, the average cost of solar in the U.S. is \$2.77 per watt - that comes out to about \$55,400 for a 20 kW system. That means the total cost for a 20 kW solar system would be \$40,996 after the federal solar tax credit discount (not factoring in any additional state rebates or incentives). How much does a 20kW Solar System cost?

Based on current electricity costs, you can expect a 20% return on your investment per year on the panels alone. The typical cost of a 20kW solar system is approximately \$40,000. However, it is important to note that prices have come down substantially over the past decade, making solar energy more affordable for a wider range of consumers.

What is a 20 kW solar panel?

A 20 kW solar panel comprises various components, which vary slightly for on-grid and off-grid systems, leading to a significant difference in their costs. There is a lot of thought process involved while looking for a solar system. A 4kW system is suitable for most homes.

How big is a 20 kW solar system?

Most solar panels have a capacity of 300 watts. To achieve a 20kW solar system, you will need 67 or more panels. Each panel occupies approximately 17 square feet, resulting in a total footprint of 1133 square feet for a 20kW solar system.

How much does an off-grid solar system cost in India?

This is beneficial for powering the sites at remote locations. Due to the usage of batteries and non-availability of subsidies, this system becomes quite expensive. In India, the average 20kW off-grid solar system price is Rs. 13,40,000 INR approximately.

How much electricity does a 20 kW solar system use?

The cost of electricity where you live is the biggest determinant of your solar savings. The table below shows average estimated electricity production numbers for 20 kW solar energy systems in cities across the U.S. By comparison, the average household in the U.S. uses about 893 kilowatt-hours (kWh) a month, which equals 10,715 kWh per year.

How does a 20kW Solar System work?

With a 20kW solar system, you can generate more electricity than you consume. The excess electricity can be sold back to the grid, allowing you to earn money from your solar panels. Based on current electricity costs, you can expect a 20% return on your investment per year on the panels alone.
