An installer should be fully qualified and certified. To find an expert, qualified solar panel installer, start your search by reading our hiring guide and then search for a recommended installer on Checkatrade. How do solar panels work?

Solar panels benefit from direct sunlight but still generate using daylight, not heat.

What are the different types of solar PV panels?

Solar PV panels consist of semi-conducting silicon-based cells covered in glass. However, there are different types of solar PV panels, with the variation being the silicon itself and the kind of glass—the closer the alignment of the silicon molecules, the more efficient the panel. The three main types of solar panels are: 1.
