

550W photovoltaic panel specifications and dimensions

Overview

What is a 550-watt solar panel?

This 550W solar panel is an high-powered option for generating maximum power from limited roof space. - It's an economical long-term investment for utility-scale systems, solar power plants, and residential and commercial applications.

What is a renogy 550W monocrystalline solar panel?

This Renogy 550W Monocrystalline Solar Panel maximizes power output while minimizing installation space and system equipment costs, primarily used for utility-scale systems, solar power plants, residential and commercial applications.

Is a 550 watt solar panel a good investment?

This will be your most economical long-term investment yet. Renogy's 550 watt monocrystalline solar panel provides an average of 2200-2750 Watt-hours (Wh) power per day (depending on sun availability). It has passed the electroluminescence (EL) test for quality assurance.

How much power does a renogy solar panel provide?

Renogy's 550 watt monocrystalline solar panel provides an average of 2200-2750 Watt-hours (Wh) power per day (depending on sun availability). It has passed the electroluminescence (EL) test for quality assurance. No hot spots.

Are solar panels IP68 rated?

IP68 rated waterproof junction box and solar connectors ensure that water and dust will not enter during extended outdoor use. The built-in bypass diodes protect the solar cells from overheating, allowing the solar panel to perform during accidental shading by bypassing the underperforming cells.
