How many MW does a 5 MW solar plant generate?

With these calculations, we can say that a 5 MW solar plant generates approximately:  $5000 \times 4 = 20,000$  units in a day  $20,000 \times 30 = 6,00,000$  units in a month And  $72,00,000$  units (72,000 MWh) in a year.

Can a 5 MW solar plant be installed on the ground?

Due to the large capacity, most 5 MW solar plants are installed on the ground. Such a project requires anywhere between 20-25 hectares of shadow-free area. Ground-mounted solar plants tend to remain cooler and more efficient. You can also employ the land space to grow crops underneath and generate additional income.

Can a business use 5 MW solar power?

A business can set up a 5 MW solar plant to use the power themselves and

work towards their net zero goals. Or they can sell the power to other businesses through open access. There are several businesses in India that are doing both – using a portion of the power for captive use and selling the rest to other corporations.

Is there a subsidy for 5 MW solar plant in India?

So, predicting the exact output of your solar plant can be tricky. Since this capacity falls under the commercial and industrial category, there is no subsidy for 5 MW solar installations. However, the Indian government still provides a 40% accelerated depreciation benefit to businesses.
