How much power does a TW Solar shingled module produce?

In early May 2018, TW Solar officially launched the shingled module, with a maximum power output of 421.9W, breaking the world record of PERC modules. In 2018, 1GW shingled modules were successfully put into production, with the highest power reaching 470W using the G1 cell package. A new 1.2GW production capacity was added in 2020.

What is the quality of Tong-Wei solar cells?

At present, the quality of Tong-wei's solar cells are first class, with technical indicators reaching the top level in the world. The company has become the No.1 manufacturer in the global cell industry with the largest capacity and shipment, the lowest cost, the highest operating rate and the fastest construction speed.

What are the advantages of a 100MW PV power station?

Lower O&M cost High temperature restriction and micro-crack resistance, front grid free, ensuring roof safety, reducing module failure rate. The same DC capacity with connection points reduced by about 5.5%. For the same installed capacity, a 100MW PV power station reduces the land occupation of 24500m<sup>2</sup>.

How does a 100MW PV power station reduce land occupation?

The same DC capacity with connection points reduced by about 5.5%. For the same installed capacity, a 100MW PV power station reduces the land occupation of 24500m<sup>2</sup>. STELLAR 1N+ Dual-Glass 635W-660W of 24.4% PV efficiency delivers higher power, better temperature restriction, lower LCOE, O&M cost and decay rate.
