

Afe power air intake system

APPLICATION SCENARIOS

Overview

Does aFe Power make a good cold air intake?

aFe Power makes really nice cold air intakes. A lot of them, actually. All the different names and stages can get confusing, so aFe Power was nice enough to break things down by stages. Whichever one you choose, you're getting a cold air intake that will improve throttle response and horsepower.

What are the different stages of aFe Power cold air intakes?

Here are the different stages of aFe Power cold air intakes available at Summit Racing: Stage 1: Performance Upgrade and Easiest Installation Direct replacements for the factory air box, an aFe Power Stage 1 cold air intake can outflow factory air intakes by up to 76% depending on application.

What is a stage 2 aFe Power air intake system?

Stage 2 Si: aFe Power Original Sealed Intake System The Si cold air intakes feature a sealed housing and cover that keeps warm engine air out and allows for a cooler, fresher, denser air intake charge. The sealed airbox is also a great choice when noise is a concern.

What is Afe momentum GT Pro 5R air intake?

The aFe Momentum GT Pro 5R air intake system is a next generation air intake that uses the most up-to-date engineering tools and techniques to provide you with the perfect blend of power and protection.

What type of filter does a stage 2 intake have?

The Stage 2 intakes are available with a choice of Pro 5R or Pro Dry S filter elements. Stage 2 Si: aFe Power Original Sealed Intake System The Si cold air intakes feature a sealed housing and cover that keeps warm engine air out and allows for a cooler, fresher, denser air intake charge.

What is a momentum HD cold air intake?

Momentum HD: Precision Engineered for Diesel Performance Designed for diesel engines, the Momentum HD cold air intakes have an innovative sealed air box design and flow-optimized intake tube to deliver the large amounts of cold air—up to 80% more than most factory systems.

Afe power air intake system

Choosing the Right aFe Power Cold Air Intake Just Got Easier

Direct replacements for the factory air box, an aFe Power Stage 1 cold air intake can outflow factory air intakes by up to 76% depending on application. Many Stage 1 intakes have a unique three-angle billet filter adapter that helps smooth the air transition into the stock intake tract for better performance, plus a heat shield to keep the power robbing hot air out.
