

Amazon solar power

Overview

Why does Amazon use solar energy?

The energy storage systems allow Amazon to store clean energy produced by its solar projects and deploy it when solar energy is not available, such as in the evening hours, or during periods of high demand. This strengthens the climate impact of Amazon's clean energy portfolio by enabling carbon-free electricity throughout more parts of the day.

Does Amazon have a solar project?

Combined, the two projects double Amazon's total announced solar paired with energy storage from 220 MW to 445 MW. "Amazon continues to be a leader in rapidly scaling up renewable energy projects here in the U.S.

How many solar and wind projects does Amazon own?

With more than 500 solar and wind projects globally, Amazon's portfolio is now big enough to power 7.2 million U.S. homes each year. Amazon invested in more than 100 new solar and wind energy projects in 2023, becoming the world's largest corporate purchaser of renewable energy for the fourth year in a row.

Will solar power power Amazon's data centers?

The latest utility-scale solar and wind projects will supply renewable energy for Amazon's corporate offices, fulfillment centers, and Amazon Web Services (AWS) data centers that support millions of customers globally.

How much energy does Amazon generate a year?

Once fully operational, Amazon's global renewable energy portfolio will generate 50,000 gigawatt hours (GWh) of clean energy, which is the equivalent amount of electricity needed to power 4.6 million U.S. homes each year.

Does Amazon have a second solar project paired with energy storage?

A second solar project paired with energy storage: Based in Arizona, Amazon's second solar project paired with energy storage enables the company to align solar generation with periods of the greatest demand, even when the sun is not shining.
