

Apollo power series 5 stage hvip system

Overview

What is Apollo power-5 VSTM HVLP turbospray (turbine) package?

The all new Apollo POWER-5 VS™ HVLP Turbospray (Turbine) Package gives you more power, more performance and more value than ever before.

How does Apollo HVLP work?

At the heart of every Apollo HVLP system is a powerful and efficient turbine delivering High Volume air at Low Pressure. It's this massive air volume that atomises the paint not the pressure, so the paint stays on the surface and does not bounce back onto surrounding areas nor into the atmosphere.

What is Apollo sprayers turbo powered HVLP?

With Apollo Sprayers turbo powered HVLP, more power and more atomizing pressure means more performance and more value for the finisher. Apollo Sprayers TrueHVLP™ POWER-5 VS™ provides the ultimate atomizing pressure to ensure the perfect finish every time!.

Why should I use a HVLP turbine spray gun?

Turbine is for use with an HVLP turbine spray gun only (single spray gun capability). Provide for more pressure and performance for a faster, finer finish. For timely service maintenance. Make transportation easy and convenient. Located on the feet of the turbine to help stabilize the unit and make things quieter.

Apollo power series 5 stage hvlp system

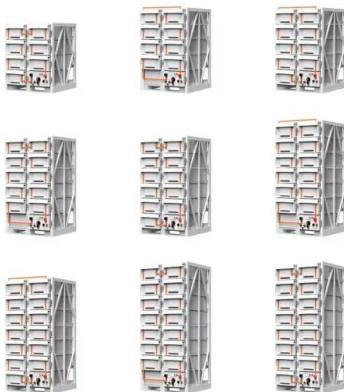

Apollo HVLP Turbo Spray

Apollo Sprayers International, Inc. was founded with a singular mission, to provide the perfect finish. Since 1966 we have led the field in highly innovative low overspray HVLP products for our automotive, industrial, woodworking, sunless spray tanning and disinfectant

Choosing the Right Apollo Turbine Sprayer System for your Application!

APOLLO SPRAYERS, INC started marketing their HVLP spray finishing technology in the United States in 1976, and was manufacturing 100% of their systems in California by 1990. Today they continue to focus on the manufacturing and marketing of HVLP turbine spray finishing and spray tanning technologies. Worldwide APOLLO H
