

Arizona solar energy

Overview

Solar power in Arizona has the potential to, according to then-Governor Janet Napolitano, make Arizona "the Persian Gulf of solar energy". In 2012, Arizona had 1,106 MW of photovoltaic (PV) solar power systems, and 6 MW of concentrated solar power (CSP), bringing the total to over 1,112 megawatts (MW) of solar.

The first commercial in the state was a 95 (kW) single-axis photovoltaic plant in , opened in October 1997 and operated by .

Arizona has two community solar farms. Tucson Electric Power has a 1.6 MW community solar farm southeast of . Consumers can purchase.

The Arizona Renewable Portfolio Standard calls for 15% renewable energy by 2025, and 4.5% (30% of that) from from renewable sources.

The purpose of the Arizona Solar Watchdog Program is to teach consumers how to check a solar installation contractor's license.

As of June 2021, Arizona was served primarily by company, and .

The Arizona Solar Business Directory contains almost 100 solar installation companies that do business in Arizona and is maintained by the Arizona Solar Power Society. The business directory allows consumers and commercial customers to contact a.
