

Arpa e renewable energy funding

Overview

The U.S. Department of Energy and ARPA-E awarded \$151 million in funds on October 26, 2009 for 37 energy research projects. It supported technologies for , , , , and . The grants also supported technologies, including and for , devices for ,

Working to find outside-the-box solutions that address existing limitations of energy technologies is a unifying goal among many ARPA-E programs. A core aspect of our mission is to look at how we can develop new materials,

new processes, and new technologies to solve complex problems, with a particular focus on decreasing carbon emissions across a ...

[Antora Energy . arpa-e.energy.gov](https://arpa-e.energy.gov)

Antora bridges the gap between renewable energy and industrial manufacturing. By tapping into low-cost, abundant wind and solar energy, Antora's thermal batteries directly displace onsite fossil fuel combustion at industrial facilities--slashing emissions and enabling manufacturers to use locally-produced, zero-emissions energy.

I. Funding Opportunity Description , arpa-e.energy.gov

A. Agency Overview The Advanced Research Projects Agency - Energy (ARPA-E), an organization within the Department of Energy (DOE), is chartered by Congress in the America COMPETES Act of 2007 (P.L. 110-69), as amended by the America COMPETES Reauthorization Act of 2010 (P.L. 111-358) to: "(A) to enhance the economic and energy security of the United ...

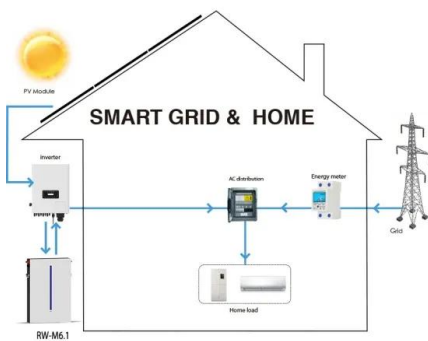

[ARPA-E eXCHANGE: Funding Opportunities](#)

To achieve attractive economics, ARPA-E expects that chemical reactors will need to be dynamically operable to optimize the entire system of renewable energy production, electrolysis capital, and energy storage.
