

Asme conference on solar energy 2014

Overview

What is the ASME Energy Sustainability Conference?

The conference joins all of ASME's world-class conferences on power generation and energy sustainability in one place and covers the latest research, technical advances, development trends, innovative technologies, solutions for renewable and other energy sustainability, and more.

What is the ASES National Solar Conference?

The ASES National Solar Conference is America's leading conference on the emerging trends, technology, and opportunities shaping the new energy economy. The American Solar Energy Society's cutting-edge conference series introduces attendees to the leaders, innovators, and entrepreneurs moving the industry forward.

What are ASME technical conferences?

ASME's technical conferences are where mechanical engineering R&D leaders from academia, industry, and government converge to share insights across engineering disciplines that shape the future of our industry.

What is the ASME Annual Meeting?

The ASME Annual Meeting is a forum for ASME members and other engineering professionals to assemble for personal and professional growth and to exchange information on how they are dealing with common challenges. It also provides insights into trends and developments affecting the future of the engineering profession.

Will ASME's nuclear engineering conference be virtual?

ASME's Nuclear Engineering Conference powered by ICONE will be virtual! The 28th International Conference on Nuclear Engineering will be held virtually on August 4 - 6, 2021. This conference is a global event for professionals who want to stay current on new technology and industry trends and

developments in nuclear technology.

What is the Journal of solar energy engineering?

Along with announcements and notes of interest, the Journal of Solar Energy Engineering publishes technical papers, technical brief notes, and discussions on all aspects of solar derived energy for generation of mechanical and electrical power, including both active and passive solar applications.

Asme conference on solar energy 2014

Volumes , International Solar Energy Conference , American ...

ASME 2003 International Solar Energy Conference March 15-18, 2003 Kohala Coast, Hawaii, USA Conference Sponsors: Solar Energy Division ISBN: 0-7918-3676-2

Dynamic Analysis of Concentrated Solar Hybridised Gas Turbine

In this work the dynamic behaviour and the control strategy of a 12MWe size gas turbine hybridised with concentrated solar heat source has been investigated. Hybridised gas turbine cycles are attractive because of their high efficiency, potentially equal to combined cycle efficiency, and because of their dispatchable power capability. An existing gas turbine model

...

ASME 2021 15th International Conference on Energy Sustainability , June 2021 , Virtual, Online View Article titled, Evaluation of the Influence of 1,4-Dioxane and Exhaust Gas Recirculation on the Performance and Emission Values of a Diesel Engine Fuelled With Low Viscous Biofuel Blend

Solar Thermophotovoltaic Converters Based on Tungsten Emitters

Results of a solar thermophotovoltaic (STPV) system study are reported. Modeling of the STPV

module performance and the analysis of various parameters influencing the system are presented. The ways for the STPV system efficiency to increase and their magnitude are considered such as: improvement of the emitter radiation selectivity and application of ...

[Volumes , ASME Power Conference](#)

ASME 2017 Power Conference Joint With ICOPE-17 collocated with the ASME 2017 11th International Conference on Energy Sustainability, the ASME 2017 15th International Conference on Fuel Cell Science, Engineering and Technology, and the ASME 2017 Nuclear Forum

Dynamic Analysis of Concentrated Solar Hybridised Gas Turbine

"Dynamic Analysis of Concentrated Solar Hybridised Gas Turbine." Proceedings of the ASME Turbo Expo 2014: Turbine Technical Conference and Exposition. Volume 3A: ...

18th International Conference on Energy Sustainability

The ASME Energy Sustainability Conference is focused on identifying innovative technologies, research and design advances, Track 7: Concentrating Solar Power 3: Technoeconomics, lifecycle analyses, balance of plant Track 8: Solar Chemistry Track 9

J. Sol. Energy Eng. , ASME Digital Collection

About the Journal The Journal of Solar Energy Engineering - Including Wind Energy and Building Energy Conservation - publishes research papers that contain original work of permanent interest in all areas of solar energy, wind energy, and energy conservation, as well as discussions of policy and regulatory issues that affect renewable energy technologies and their implementation.

Proceedings of 17th International Conference on ES2023

Access groundbreaking findings from the ASME ES2023 Conference on energy sustainability. Shop the proceedings with member benefits now! Proceedings of the Energy Sustainability and Fuel Cell conference cover cutting-edge research in solar and other

ASME 2017 11th International Conference on Energy Sustainability

Topics: Cascades (Fluid dynamics), Concentrating solar power, Latent heat, Thermal energy storage, Energy storage, Phase change materials, Heat, Solar energy, Melting, Energy generation Fluidized-Bed Heat Transfer Modeling for the Development of Particle/Supercritical-CO₂ Heat Exchanger

ASME 2014 8th International Conference on Energy Sustainability

The ASME 2014 8th International Conference on Energy Sustainability took place in Boston (USA) from June 30 to July 2, 2014. This conference has become a popular venue for presentation on the progress in solar thermal research, with a focus on US activities but there was a significant representation from other international researchers.

ASME 2013 7th International Conference on Energy Sustainability

ASME 2013 7th International Conference on Energy Sustainability collocated with the ASME 2013 Heat Transfer Summer Conference and the ASME 2013 11th International Conference on Fuel Cell Science, Engineering and Technology

[Volumes , ASME Power Conference](#)

ASME 2018 Power Conference collocated with the ASME 2018 12th International Conference on Energy Sustainability and the ASME 2018 Nuclear Forum June 24-28, 2018 Lake Buena Vista, Florida, USA

Volumes , ASME Power Conference , American Society of ...

ASME 2017 Power Conference Joint With ICOPE-17 collocated with the ASME 2017 11th International Conference on Energy Sustainability, the ASME 2017 15th International Conference on Fuel Cell Science, Engineering and Technology, and the ASME 2017 Nuclear Forum

A Comprehensive 4E Study on the Performance of Bifacial Solar ...

Abstract. Solar energy will be the most sought-after source for generating electricity shortly because of its availability in abundance and pollution-free nature. Bifacial photovoltaic (PV) technology increases the power output through the albedo effect. However, the major drawback of PV-based power is that the efficiency is very low at less than 25%. The ...

ASME 2018 12th International Conference on Energy Sustainability

ASME 2018 12th International Conference on Energy Sustainability collocated with the ASME 2018 Power Conference and the ASME 2018 Nuclear Forum June 24-28, 2018 Lake Buena Vista, Florida, USA

A Computational Model for Performance Prediction of a Hybrid ...

In this paper we investigate the performance of an integrated solar photovoltaic and thermal (PV/T) liquid (water) collector using a computational simulation program. A ...

Advanced Exergy, Exergoeconomic, Exergoenvironmental Evaluation of ...

Abstract. In this article, optimal design and advanced exergetic, exergoeconomic, and exergoenvironmental analyses of a trigeneration system for an office building based on integration flat plate solar collector and gas turbine have been performed. The proposed system includes a heat recovery steam generator, a steam turbine, a solar plate collector, and an ...

Modeling the Solar Cells Temperature and Power Output From ...

Abstract. Almost all available power and temperature models of photo voltaic (PV) panels can only predict the power output and the cell temperature under clean conditions. The objective of this research is to study the effect of dust accumulation on the solar cells temperature as well as to model the solar cells temperature

and the power output from PV ...

[Journal of Solar Energy Engineering](#)

Along with announcements and notes of interest, the Journal of Solar Energy Engineering publishes technical papers, technical brief notes, and discussions on all aspects of solar ...

Second Law Analysis of Integrated Solar Combined Cycle Power ...

Integrated Solar Combined Cycle (ISCC) is an operationally simple, clean electric power generation system that is economically more attractive vis-à-vis stand-alone Concentrating Solar Power (CSP) technology. The ISCC can be designed to achieve two primary goals: (1) replace natural gas combustion with solar thermal power at the same output rating to ...

[Volumes , ASME Power Conference](#)

View Article titled, Retracted: "Benchmark Thermodynamic Modelling Comparison of a Novel Modular Air-Cooled Condenser With Current Dry-Cooling Methodologies" [ASME 2016 Power Conference collocated with the ASME 2016 10th International Conference on Energy Sustainability and the ASME 2016 14th International Conference on Fuel Cell Science, ...

19th International Conference on Energy Sustainability

This year, ES2025 will be co-locating with the Summer Heat Transfer Conference. Sponsored by ASME's Advanced Energy Systems and Solar Energy Divisions. This year's Tracks Include: Track 1: Conference Theme - Decarbonizing Energy, Water and Track 2

[International Solar Energy Conference](#)

ASME 2001 Solar Engineering: International Solar Energy Conference (FORUM 2001: Solar Energy -- The Power to Choose) April 21-25, 2001 Washington, DC, USA Conference Sponsors: Solar Energy Division 0-7918-1670-2 Close mobile

Finite Element Modeling, Analysis, and Life Prediction of ...

Finite Element Modeling, Analysis, and Life Prediction of Photovoltaic Modules. A Photovoltaic (PV) module consists of layers of different materials constrained together through ...

Numerical Simulation on the Formation of a Toroidal Microvortex ...

Optoelectrokinetic effects were effectively used for rapid concentration of particles in microfluidics. In this study, we clarified detail mechanism of particle aggregation by ...

Energy and Exergy Study of Effective Parameters on ...

Photovoltaic/thermal (PV/T) system is a kind of solar system that converts solar energy to electrical and thermal energy simultaneously. In this paper, the effect of some parameters, such as packing factor, fin number, and fin height as well as environmental and dimensional parameters on the performance of the PV/T system with natural air flow from the ...

Economic Optimization of a Concentrating Solar Power Plant With ...

System-level simulation of a molten-salt thermocline tank is undertaken in response to year-long historical weather data and corresponding plant control. Such a simulation is enabled by combining a finite-volume model of the tank that includes a sufficiently faithful representation at low computation cost with a system-level power tower plant model. Annual ...
