

Aspect solar energy bar 225wh

Overview

Can a solar energybar 225 be charged from AC?

Hi Folks: I got hold of an Aspect Solar EnergyBar 225. It is a LifePO4 battery from a company that went out of business. It can be charged from AC with a little adapter that provides 15V 4A or by their solar Panel EP-60 that provided the same specs. Here is a detailed test of the battery (also attached as a pdf)
:.

How do I charge a solar energybar 225?

You must REGISTER before you can post. I got hold of an Aspect Solar EnergyBar 225. It is a LifePO4 battery from a company that went out of business. It can be charged from AC with a little adapter that provides 15V 4A or by their solar Panel EP-60 that provided the same specs.

Is aspect solar a delinquent company?

Aspect Solar is "Status: Delinquent" with them. So much for Aspect Solar's 5 Year Guarantee. I spent around \$2K on their gear, which had some problems delivering the proper voltage when the panels were hooked up but at least 12V was present when simply taking power from the controller/charger unit.

How long can a solar panel charge an energy bar?

The foldable EP60 solar panel is able to charge the energy bar in about 7-13 hours in full sun. With a wall or cigarette charger, it's even faster. I have not experienced any interference on HF with the 250. Worth every penny!
