Solar Wall Lights

Solar wall lights work by using solar panels to convert sunlight into electrical energy, which is then stored in a battery inside the light fixture. The solar panel is designed to absorb sunlight during the day, and either sits on top of the light, or may be a little unit that can be placed nearby.

The 11 Best Outdoor Solar Lights of 2024, Tested and Reviewed

Over the past two years, we've tested 62 different outdoor lights including solar pathway lights, smart lights, spotlights, lanterns, wall-mounted, and string lights. We put each light to the test either in The Lab, where we simulated hail storms and filmed the lights overnight to see if they truly stayed on from dusk until dawn, or installed them at our own homes across the ...
