Leadership in Renewable Energy

It is critically important that participants in the renewable energy community continue to push for better-performing and lower-cost products, more favorable public policies, increased supply of capital, and greater education of the populace and the marketplace about clean energy. However, at the root of these four thrusts is one common essential element, ...

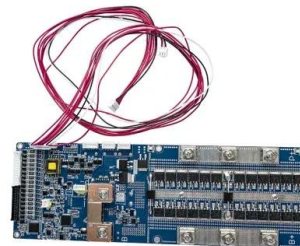

Top 10: Energy Leaders in the US

The US is the second largest producer and consumer of electricity globally, generating around 15% of the world's electricity supply -- about half as much as China. The International Energy Agency (IEA) highlights how, thanks to the introduction of major energy and climate policy reforms, the States is on a path towards a clean, secure and affordable energy ...
