around 5 cent/kWh for households which is far below market prices. Industrial companies have no such price guaranties, ye , the majority of companies and all households buy energy from EPS. These subsidy-like prices make it very difficult to at a has great potential in bioenergy, yet capacities.

Given that the levelised cost of rooftop solar PV investments is now below EUR 100/MWh in most markets around the world, including in countries like Serbia,

retail prices in this range and above are typically considered sufficient to drive investments. In fact, recent analysis of different states.
