

# Average standalone energy storage price per 50kWh in Greece

## Overview

---

While Greece currently has virtually no utility-scale battery storage capacity installed, the country's project pipeline points to explosive growth in the coming years.

While Greece currently has virtually no utility-scale battery storage capacity installed, the country's project pipeline points to explosive growth in the coming years.

Starting in May 2023, Greek households and farmers are able to apply for public funds to cover the purchase and installation of small solar+storage systems up to 10.8kW (featuring up to 10.8kWh of storage). The grants can cover up to 75% of total cost of a system.<sup>10</sup> The total budget available is.

According to EnergyPress, the finalized list stands as follows: Bids in the tender round were priced at between EUR 33,948 per MW and EUR 64,122 per MW, with the weighted average price of the successful proposals standing at EUR 49,748 per MW annually. Bids were capped at EUR 115,000 per MW per.

A new ministerial decree sets the framework for the installation of 3.55 GW of energy storage – standalone batteries, without subsidies. The new framework for batteries, presented by the Ministry of Environment and Energy, is under public consultation. It drastically increases the ambition.

A draft ministerial decision envisages the installation of 3.55 GW of standalone battery energy storage systems which will be granted priority connection to the transmission or distribution grid and operated on a merchant basis without subsidy support. From ESS News The Greek Ministry of Energy and.

The residential energy storage market in Greece is expanding due to the country's increasing adoption of renewable energy sources, especially solar power. With a significant number of homes installing solar panels, energy storage solutions are becoming essential to store excess power for later use.

This investment should support the installation of the total remaining capacity of up to 900 megawatts for the standalone storage plants). The storage

projects to be supported by the scheme will be selected through a tender process held until the end of 2023. No support will be granted in cases.
