

Average wind solar storage price per 500MW in Spain

Overview

The tool displays the capture price received by wind and solar power assets using hourly production and monthly average price data for Spain, Germany, Italy, France, and the United.

The tool displays the capture price received by wind and solar power assets using hourly production and monthly average price data for Spain, Germany, Italy, France, and the United.

Platts has launched an “interactive explorer” tool that shows the capture price received by wind and solar power assets, using hourly production and monthly average price data for Spain, Germany, Italy, France, and the United Kingdom. Image: Maxim Grama y Andreas Franke, S&P Global Commodity.

Seventh edition of the summary of renewables in Spain, with a review of the main data summarising a year 2024 marked by the growth of solar energy, the stagnation of wind energy and fears in the sector of price cannibalisation. The data for this report are publicly available on Red Eléctrica 's.

German solar capture prices, which fell to five-year lows in May and June, more than doubled to average Eur65.47/MWh for July as the number of negative hourly prices fell sharply compared to record levels in the second quarter. The capture rate for German solar jumped to 75%, the highest since.

What are the current long-term solar and wind power prices?

Find these prices every quarter in our PPA Insights report, where we assemble solar and on-shore wind power prices for most European countries. Link to report: Also interesting is our sister website with lots of data on European power.

Baringa's Spanish Reference Case Report covers our quarterly-updated projections of wholesale power prices and generation-weighted average captured prices for solar and wind generation to 2050. It also includes our capacity and generation projections. Our latest reports include an in-depth analysis.

Thanks to publicly available data from the national grid and market operators, respectively Red Eléctrica de España (REE) and OMIE, we were able to calculate the average captured price for both technologies in each AC over the 2014-2017 period, based on hourly day-ahead wholesale market prices**. How much does wind energy cost in Europe?

Wind power prices, on the other hand, are more stable and range between €60 and €80/MWh. This indicates that wind energy in Europe tends to be less location-dependent than solar energy. However, the key question is: How do these prices compare with the capture prices?

.

Why did solar prices fall in Spain in April?

Oversupply from solar and falling demand deflated the market value of renewables in April with Spanish solar hit hardest, Platts Renewable Energy Price Explorer shows. In Spain, the volume-weighted monthly average capture price for solar plunged to Eur14.16/MWh with the technology only capturing 53% of April's wholesale spot price average.

Is wind power a good source of electricity in Spain?

Some of these data are still provisional so they may vary somewhat when they become definitive, but they will be small changes that will not affect the overall picture. As Red Eléctrica itself announced in December, wind power is once again the leading source of electricity generation in Spain with 23%.

How much does solar PV cost compared to wind?

Solar PV's advantage compared to wind is clear with an average captured price – for the entire mainland Spanish fleet – of 47.8 €/MWh (+3.9% compared to the average day-ahead prices) against 41.8€/MWh (-9.3%) throughout the 2014-2017 period. Wind: Castillian Carnage Strong differences can be observed between the most equipped ACs.

Will Spain become Europe's second-largest solar market?

This report delves into the policies, technological advances, and market forces shaping Spain's rise as Europe's second-largest solar market. It also highlights the challenges ahead, from grid integration to price stability.

What happened to solar power in Germany in May?

In Germany, solar values fell to a five-year low in May, capturing only 51% of the average power price amid a record number of negative hourly prices. The Explorer shows the "capture price" renewable energy generators receive based on hourly output and pricing data on a monthly average basis.

Average wind solar storage price per 500MW in Spain

Spanish Auction Of Renewables: Well Distributed, Led By Solar

Last Tuesday, Spain's government held the long-awaited auction of 3,034 MW of new renewable licenses with a high level of participation. A total of 84 companies made bids, ...

Renewable energy projects in Spain: leading Europe's green ...

Spain is leading Europe's clean energy push with major solar, wind, and green hydrogen projects. Explore how policy and investment are driving renewable growth.

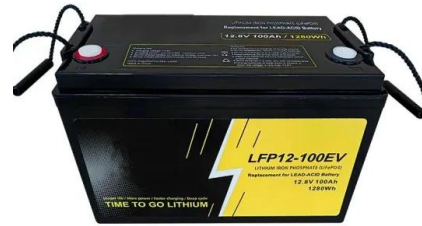

Renewables in Spain: TotalEnergies Inaugurates its ...

Seville/Paris, May 22nd, 2025 - TotalEnergies inaugurates its largest solar power plant cluster in Europe, near Sevilla in Spain. It consists of five solar projects with a total installed capacity of 263 MW.

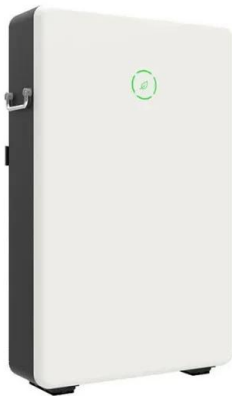

[Spain: Wholesale electricity market report](#)

Baringa's Spanish Reference Case Report covers our quarterly-updated projections of wholesale power prices and generation-weighted average captured prices for solar and wind generation to 2050.

Spanish Auction Of Renewables: Well Distributed, Led ...

Last Tuesday, Spain's government held the long-awaited auction of 3,034 MW of new renewable licenses with a high level of participation. A total of 84 companies made bids, reaching 9,700 MW, which is three times ...

National Survey Report of PV Power Applications in Spain

Solar PV develops in Spain mainly in ground mounted utility-scale plants. The available land, the good solar resource and the competitiveness of the technology made PV the most installed ...

Solar Farm Cost Investment Unveiled: True Cost of ...

Solar panels: Solar panel prices have decreased significantly in recent years, with the average cost per watt now ranging between \$0.20 and \$0.25. For a 1 MW solar farm, the solar panel cost would be approximately ...

New interactive map of renewable energy capture ...

Platts has launched an "interactive explorer" tool that shows the capture price received by wind and solar power assets, using hourly production and monthly average price data for Spain, Germany

(PDF) Are the Purchase Prices of Solar Energy ...

The reduction in construction and maintenance costs per MW of renewable energy facilities, together with low interest rates, have led to a significant growth in the purchase prices paid for these

[Spain installed 6.93 GW of PV in 2022](#)

Spain installed 8,312 MW of new renewable energy capacity last year, including 4,281 MW of utility-scale solar, 2.64 GW of distributed-generation PV systems, and 1,382 MW of wind power.

Price Trends: Solar and wind power costs and tariffs

The growth of solar and wind power capacities depends largely on their cost and tariff trends. Various domestic policies and global shocks have impacted these two factors. ...

The progress of photovoltaics in Spain

The European Union's energy mix in 2024 saw a major shift, with solar power generating 11% of electricity across the EU-27, surpassing coal for the first time. Wind energy also overtook gas as the second-largest energy ...

ESS

Spain awards 3,034 MW of wind, solar in new auction, ...

The Spanish government on Tuesday awarded a total of 3,034 MW of wind and solar power capacity in the first renewable energy auction held since July 2017.

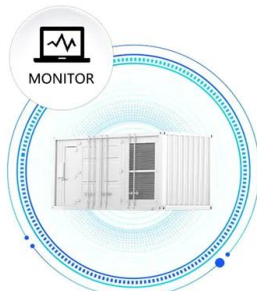

power2market , Future of solar and wind PPA prices

Unsurprisingly, there are significant price differences between different countries for solar energy. In Spain, the break-even price for a solar PPA is only EUR38/MWh, while in Finland it is significantly higher at EUR115/MWh - not ...

How Battery Storage Could Have Prevented Spain's 2025 Blackout

On April 28, 2025, a catastrophic blackout hit Spain and Portugal, plunging millions into darkness. Hospitals scrambled for backup power, trains stopped, and businesses lost billions. It was one ...

Spain

In September 2002, Spain was the first European country to introduce a "feed-in tariff" funding system for solar thermal power. This funding system granted a premium on top of the electricity pool price of 12 EUR cents for ...

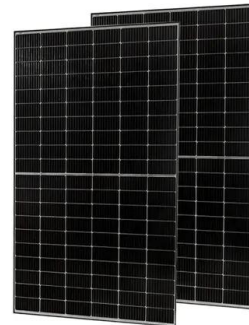

UPDATE

The Spanish government-led renewable energy auction on Tuesday awarded 3,124 MW of wind and solar power for an average price of EUR 30.5 (USD 35.54) per MWh, the ministry for the ecological transition said ...

Strategy for energy storage in Spain for 2050

To do that, it is necessary to study the different storage technologies and make a comparison between them, to analyse which storage systems are more useful for large-scale energy ...

Wind energy in Europe

New installations in the EU-27 reached record levels in 2023 with 16.2 GW of new wind power capacity added representing 88% of all installations in Europe. For the EU to reach its 42.5% ...

PPA Insights: European solar and wind power prices

What are the current long-term solar and wind power prices? Find these prices every quarter in our PPA Insights report, where we assemble solar and on-shore wind power ...

Deflating capture prices pull solar, wind market values down ...

Weakening capture prices for solar and wind across Europe's main power markets have deflated 2024 market values of green electricity, with Spain and Germany most impacted, S&P Global ...

Spain Unveils 820 MW Solar Energy Storage for Q4 ...

Spain has announced 820 MW of energy storage projects for Q4 2024, with 182 MW focused on hybridizing solar and wind installations. Iberdrola leads this initiative, including projects like the FV Revilla-Vallejera Hybrid and ...

"Fair 'made in Europe' industrial policy for wind power ...

At present, the average year-on-year rate of growth of wind power capacity in Spain is 5.3% over the last 5 years, and to reach the new 2030 target would require this rate to double to 11.8% ...

Solar PV Market in Spain: Insights into the Current

The leading annual capacity additions and significant investments in solar PV are solidifying Spain's position as a major player in the global solar market. While challenges exist, the future of solar energy in Spain ...
