

BESS project financing options in Tunisia 2030

Overview

What are the barriers to Bess project financing?

Emily Sidhu, director in the banking and investment team at UK Infrastructure Bank (UKIB), explains that the main barrier to the project financing of BESS projects relates to revenues.

Is blended financing a viable financial model for Bess projects?

As per McKinsey & Company, the market size of the BESS ecosystem is expected to reach \$150 billion by 2030. Thus, blended financing as a financial model should be considered, where public capital can be used as a first-loss capital for BESS projects. This offers private financiers the comfort of providing capital at a competitive rate.

Can Bess projects be bundled together?

Independent BESS projects, only supporting renewable energy projects, can be bundled together, and issued as green bonds to potential large investors.

Can a Bess project be issued as a green bond?

Independent BESS projects can be bundled together and issued as green bonds to potential large investors. A partial credit guarantee can be provided by public capital providers to improve the credit ratings of green bonds, which is necessary to attract these low-risk-seeking investors.

What is the global Bess capacity in 2023?

As per the International Energy Agency (IEA), global BESS capacity was 85 GW (approximately 190 GWh) at the end of 2023 and is expected to reach 400 GW (over 1,200 GWh) by 2030 to enable the seamless grid integration of renewable energy, with the net zero 2050 emissions scenario as a target.

Is Bess a good investment?

Although risk-taking investors seeking a higher return on their investment in BESS can translate into higher energy tariffs, it is not ideal for large-scale adoption of BESS. Moreover, the capital available with this class of investors is limited compared to this solution's growth potential.

BESS project financing options in Tunisia 2030

Mizuho Closes Landmark Financing for KKR and Infracapital's ...

This deal marks a significant milestone as the first BESS financing in EMEA for Mizuho, reinforcing the bank's commitment to supporting energy transition and ...

Conclusion of Tunisian BESS project

The assessment consisted of: Sizing of BESS considering standard wind and solar PV power plants Modelling the operation of the BESS according to the availability of generation in the ...

Financing Battery Energy Storage for Sustainable ...

This article delves into the crucial role of battery energy storage systems (BESS) in boosting renewable energy generation and its subsequent distribution. It also examines the financial challenges that arise in the ...
