

BESS supplier quotation in New Zealand 2026

Overview

Will Bess become a cog in New Zealand's energy landscape?

We expect that BESS will also become an increasingly important cog in New Zealand's broader energy landscape and that we will see utility-scale solar projects incorporating batteries as a means of providing dispatchable generation during peak demand and enhancing grid stability.

What does Bess stand for?

Paris, 19 September 2024 – Saft, a subsidiary of TotalEnergies, has won a major contract to deliver a turnkey, utility-scale battery energy storage system (BESS) for Genesis Energy Limited, a listed New Zealand generation, wholesale, and retail energy company.

Why is Bess important in New Zealand?

BESS will become increasingly important in the future as New Zealand's power system relies on more intermittent and variable generation. Work set out in the roadmap includes: Improving network pricing to maximise consumer benefits from new and emerging technologies, including BESS.

What is a Bess battery & how does it work?

A BESS is a number of large batteries that operate together as an energy storage facility, and is a bidirectional user of an energy network - meaning that it is able to 'take' energy from the grid (to store), and it can discharge that energy back into the system when required.

What is a Bess system?

BESS systems allow for increased penetration of intermittent renewable generation, which complements the global transition to zero carbon generation. Infratec's experience with BESS systems includes concept design and development, detailed design, installation, and integration of BESS systems in New Zealand and throughout the ASEAN regions.

When will Saft be launching a Bess system?

Saft will provide a turnkey solution based on 70 of its Intensium Shift+ lithium-ion battery containers combined with power conversion and control systems. It is planned to come online in the third quarter of 2026. “This will be Saft’s third utility-scale BESS to support the New Zealand grid”, said Hervé Amossé, Saft EVP Energy Storage System.

BESS supplier quotation in New Zealand 2026

Solar + BESS: An answer to New Zealand's electricity ...

We expect that BESS will also become an increasingly important cog in New Zealand's broader energy landscape and that we will see utility-scale solar projects incorporating batteries as a means of providing ...

Battery energy storage systems roadmap released

The Electricity Authority Te Mana Hiko has published a draft two-year roadmap that sets out our work to support investment in battery energy storage systems (BESS).

Solar + BESS: An answer to New Zealand's electricity ...

Over recent years, it has become common for utility-scale solar projects in Australia to include a grid-scale battery energy storage system (BESS) to provide energy generated by the solar farm to the grid outside of the times ...

Enhancing New Zealand's energy with Glenbrook BESS

The Glenbrook BESS meets urgent energy requirements while also laying the groundwork for the renewable energy transition. It will store excess renewable energy generated during off-peak hours, ensuring a steady supply during

peak ...

BESS suppliers in Great Britain: Q3 2025 update

The containerised BESS market, once at risk of becoming dominated by Tesla and CATL, has become more competitive with the entrance of rapidly growing challengers. New European and ...

Saft utility-scale BESS will power Huntly Portfolio to ...

Saft is providing a complete turnkey BESS based on 70 of its Intensium® Shift+ lithium-ion battery containers Genesis Energy Limited is developing a 100 MW/200 MWh BESS at Huntly Power Station on New ...

New Zealand's 'first grid-scale battery storage project' ...

Electric power distribution company WEL Networks and developer Infratec have launched their grid-connected battery energy storage system (BESS) in New Zealand. The two companies said last Friday (20 ...

New analysis reveals European solar battery storage market ...

Latest analysis from SolarPower Europe reveals that, in 2023, Europe installed 17.2 GWh of new battery energy storage systems (BESS); a 94% increase compared to 2022. ...

Ark, Hanwha ink supply deal for 2.2 GWh BESS in Australia

Ark Energy conducted a yearlong bidding process to select a BESS supplier for the project and identified Hanwha Energy as the preferred bidder in November 2024. The ...

Saft to deliver 200MWh BESS at New Zealand's ...

The system is planned to come online in the third quarter of 2026. The BESS will become Saft's third utility-scale BESS in the New Zealand market. One of these is the 100MW/200MWh system provided to state-owned ...

[BESS PROCUREMENT REFERENCE DOCUMENT](#)

For such provision, the O& M bidder should have a capacity contract with the supplier or authorized agent of the supplier in order to carry our periodical test to the system, replace ...

Genesis Energy Launches Construction of 200MWh Battery ...

Genesis Energy Begins Construction of 200MWh BESS in New Zealand By George Heynes June 6, 2025 Genesis Energy, a publicly listed energy company in New ...

Chinese firms increase BESS market share, not in North America

The research finds Tesla as the largest battery energy storage system (BESS) supplier by shipments for the second year in a row, with a global market share of 15%. As with ...

Cost, shipping, energy density drive move to 5MWh ...

Prices are expected to increase nominally in 2025, as shown in the chart above, before jumping more substantially in 2026. That larger increase is primarily down to new tariffs imposed by the US on battery products from ...

Genesis Energy, a listed New Zealand generation, wholesale, ...

Genesis Energy, a listed New Zealand generation, wholesale, and retail energy company, has started constructing a 100MW/200MWh battery energy storage system (BESS) on the ...

[BESS in North America_Whitepaper_Final Draft](#)

These battery cost reductions will be driven by increasing battery demand from the automotive industry, supplier diversification, and product standardization - making BESS applicable across ...

Battery Storage Procurement: It's the Wild West Out ...

The top-tier BESS suppliers are mostly large, vertically integrated multinationals with manufacturing capability within their corporate group and solid balance sheets. They are willing and able to provide the "standard offerings" noted ...

New Zealand's First Utility Scale Battery Energy ...

New Zealand's First Utility Scale Battery Energy Storage System (BESS) Gains Traction WEL Networks and Infratec are pleased to announce that they have entered into major contracts for the supply and build of New Zealand's largest ...

Display screen
Linux operation system
quad-core processors
smooth and stable system

Genesis Energy Launches Construction of 200MWh Battery ...

The current project is considered the first phase of this broader plan. The Huntly BESS will mark Saft's third utility-scale BESS installation in New Zealand. One of their previous ...

Genesis Energy Launches Construction of 200MWh Battery ...

Genesis Energy Begins Construction of a 200MWh BESS in New Zealand -- Genesis Energy, a prominent energy generation, wholesale, and retail company in New ...

Hithium

Hithium has shipped over 30GWh of BESS products (cells, systems and others) to date and is ranked as a Tier 1 BESS supplier in 2024. The company is headquartered in Xiamen, China, with locations in Shenzhen, Chongqing, ...

Hithium unveils 6.25 MWh BESS, sodium-ion battery ...

Chinese energy storage specialist Hithium has used its annual Eco Day event to unveil a trio of innovative products: a 6.25MWh lithium-ion battery energy storage system (BESS), a specialized sodium-ion battery for ...

Commercial and Industrial ESS
