Wind energy

The first wind energy facility in Switzerland was put into operation in 1986 near Soolhof (Langenbruck, canton of Basel-Landschaft) and had an output of 28 kilowatts. There are currently almost 40 large wind energy facilities in operation in Switzerland which produce a combined total of around 140 gigawatt hours of electricity.

[Energy . University of Basel](#)

Last year's electricity mix was 94.2% foreign nuclear power, 5.5% domestic hydropower and 0.3% remaining domestic renewable energy sources: solar, wind and biomass. In January 2020, foreign nuclear power was replaced by European hydropower, which since then accounts for the main share of the electricity mix at the University of Basel, with approximately 95%.
