

Batteries

LiFePO₄ Battery, safety

Wide temperature: -20~55°C

Modular design, easy to expand

The heating function is optional

Intelligent BMS

Cycle Life: ≥ 6000

Warranty: 10 years

Overview

electric battery electrochemical cell

electric battery electrochemical cell

What is batteries?

Batteries is an international, peer-reviewed, open access journal on battery technology and materials published monthly online by MDPI. International Society for Porous Media (InterPore) is affiliated with Batteries and their members receive discounts on the article processing charges.

What is an electric battery?

An electric battery is a source of electric power consisting of one or more electrochemical cells with external connections [1] for powering electrical devices. When a battery is supplying power, its positive terminal is the cathode and its negative terminal is the anode. [2].

What is a rechargeable battery?

Rechargeable batteries are (re)charged by applying electric current, which reverses the chemical reactions that occur during discharge/use. Devices to supply the appropriate current are called chargers. The oldest form of rechargeable battery is the lead-acid battery, which are widely used in automotive and boating applications.

What is a secondary battery?

Secondary cells are made in very large sizes; very large batteries can power a submarine or stabilize an electrical grid and help level out peak loads. As of 2017, the world's largest battery was built in South Australia by Tesla.

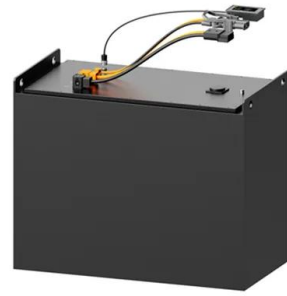

What is a lithium ion battery?

"Lion" redirects here. Not to be confused with Lion. A lithium-ion or Li-ion battery is a type of rechargeable battery that uses the reversible intercalation of Li^+ ions into electronically conducting solids to store energy.

What is a dry cell battery?

Lead-acid batteries did not achieve the safety and portability of the dry cell until the development of the gel battery. A common dry cell is the zinc-carbon battery, sometimes called the dry Leclanché cell, with a nominal voltage of 1.5 volts, the same as the alkaline battery (since both use the same zinc - manganese dioxide combination).
