

Battery synergy

Overview

What is synergy Sciencetech?

SYNergy ScienTech Corp, located in the Science-Based Industrial Park in Hsinchu, is a leading corporation in the design, development, and manufacturing of rechargeable lithium-ion and lithium-ion polymer batteries in Taiwan.

What is a second synergy?

The second synergy is made possible by the prominent concentration of arbitrage profits around peak time. If the EAW does not fully overlap with peak time, the BESS can capture a high share of the original arbitrage profits without excessive reduction in the EFR capacity payments.

What is synergy's management philosophy?

Established in March 1997, SYNergy practices a management philosophy of innovation, diligence and teamwork. The core of the corporation's professional team consists of scientists and engineers with expertise in chemistry, materials science, mechanical engineering, chemical engineering, power electronics, product design, and quality management.

Why should you choose synergy?

SYNergy is producing high quality and cost-effective batteries for portable electronic and other devices. As a premier solution provider in power source field, SYNergy emphasizes product quality and performance, and has obtained ISO 9001 and ISO14001/UL-1642 approvals since 1999 and 2001, respectively.

Can batteries provide energy balancing?

Batteries could provide energy balancing by offering numerous system services. Synergies between fast frequency response and energy arbitrage are studied. A battery management strategy is developed to leverage value from

these services. Most arbitrage revenues can be captured without foregoing frequency response payments.

Can a battery energy storage system deliver fast frequency response and Energy Arbitrage?

This paper assesses whether synergies exist between two of the most significant of these services, fast frequency response and energy arbitrage, if a battery energy storage system (BESS) is used to deliver both. A techno-economic model is developed to simulate 600 possible fast frequency response availability windows.

Community Batteries for Household Solar Program

In 2022, the Federal Government announced \$200 million in funding for the Community Batteries for Household Solar budget measure to deploy 400 community battery projects across Australia. Find out more.

Kwinana Battery Energy Storage System 2 (KBESS2)

Kwinana Battery Energy Storage System 2 (KBESS2) will be Synergy's second lithium-ion, large scale battery energy storage system in the SWIS. In developing KBESS2, our SynergyRED team are working on a range of innovative, industry-leading delivery concepts to create additional utility scale energy storage solutions for the SWIS.

Battery Storage Northern California

Hybrid Systems are connected to PG& E's grid, BUT, they also provide you with battery storage. If your system is properly managed, you'll keep your power on in a blackout - We Have An App For That! A hybrid system will allow you to have power during a blackout because it runs off of your battery's stored energy.

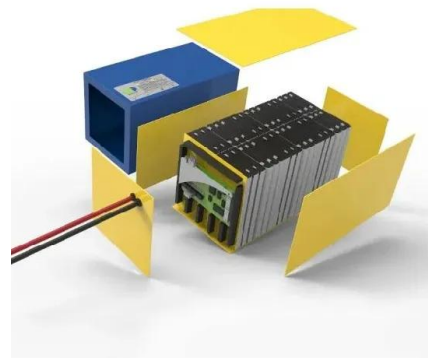

Construction begins on 2 GWh of storage in Australia

The Collie battery will be Synergy's third large-scale battery energy storage system with the government-owned energy generator and retailer planning to build 3 GWh hours of storage by 2025.

Perth company lands \$50 million contract on Collie big battery build

A Perth electrical company has won a \$50 million contract for works on Western Australia's 500 MW / 2,000 MWh Collie battery energy storage system just months after scooping a \$160 million deal for the project. Perth-based Southern Cross Electrical Engineering (SCEE) has been awarded a \$50 million (USD 33.6 million) contract by state-owned energy utility Synergy, ...

About us

Synergy has installed the containerised battery systems at what will be WA's biggest grid-connected battery energy storage system, providing 200 megawatts of power with 800MW hours of energy storage. Once complete, the new battery system will be capable of powering 370,000 average homes in WA for approximately four hours.
