

Best energy supplier if you have solar panels

Overview

An export tariff is money paid out by most energy companies (certainly all the big ones) for the electricity you generate at home. It also pays you for the electricity you sell or “export”.

All export payments are set by Ofgem – so there’s no need to compare energy companies, or switch for a better deal on your payments. If you want to switch energy suppliers.

No – you don’t have to stay with the same licensee forever. You can change whenever you want. And if you want to transfer from FIT payments to SEG payments, you can.

All the main energy companies – including British Gas, EDF, E.ON, Npower, and ScottishPower, as well as OVO Energy – must offer export contracts. Many smaller suppliers also offer.

If you think your energy supplier is charging you over the odds, and you’d like to look around for a better deal, don’t be put off just because you’ve got a tariff arrangement. Whether you have the Feed-in-Tariff or Smart Export Guarantee with a particular energy supplier, you can still switch to a different supplier for your.

Why should you install solar panels on your home?

Installing solar panels on our home can help us save money on our bills as well as increasing the amount of renewable energy going into the National Grid (and earning us money for selling that excess energy). Solar panels have been subject to two Government schemes to pay householders for energy:.

Are solar panels a good idea?

Solar panels are a green way to use your home to make electricity. You get to use this electricity in your home – and if there's any left over, you can sell it through an export tariff. Bonus! Here are just a few of the many benefits of having your own solar energy system: How much does it cost to switch to solar power?

.

Can solar panels be profitable?

Installing solar panels and signing up to an SEG tariff is unlikely to be anywhere near as profitable as FIT rates were just a few years ago for two reasons: All energy suppliers with more than 150,000 customers are required to offer a Smart Export Guarantee tariff and a couple have voluntarily decided to offer them.

What is the best solar energy export tariff?

The best overall export tariff is Intelligent Octopus Flux. With this tariff, customers who choose Octopus as their energy supplier can typically gain 29.4p for every kWh (kilowatt-hour) of solar electricity they export between 4pm and 7pm, and 22.1p per kWh at all other times.

Can I switch energy suppliers with solar panels?

The company paying your subsidy is known as your FIT/SEG licensee – but they don't need to also be your energy supplier. You can actually have separate contracts for your energy supply and your export payments. Switching energy suppliers with solar panels doesn't need to affect your export tariff contract at all.

Can you buy solar panels if you can't afford solar?

If you can choose your energy provider, you might be able to choose one selling renewable power. If you want to power your home with renewable energy but can't afford rooftop solar panels, you might feel a bit stuck.
