

Best solar panel companies in phoenix az

Overview

Solar companies offer different warranties on their products and services, but you can find some common themes among the most prominent companies.

Determining which type of solar panels will best suit your lifestyle is an important part of choosing an installation company. For residential use, there are typically three solar panel options:

Knowing the median household size in Phoenix, which is 2,033 square feet, and the average amount of energy each home uses in Arizona—1,048 kWh per household—can help you.

An important part of solar installation is determining what size system, or how many solar panels, will work best for your home. To best determine how many solar panels you'll need, be ready to give companies the following information:

1. How much available space is on your roof
2. The amount of energy your

Solar companies offer different warranties on their products and services, but you can find some common themes among the most prominent companies. For example, most solar companies and.

Determining which type of solar panels will best suit your lifestyle is an important part of choosing an installation company. For residential use, there are typically three solar panel options:
