FAQ

Attach solar panel to solar charge controller - do this only after you attached the battery and never before otherwise your solar charge controller may not regulate voltage and current appropriately. Attach load to your battery - you always want to discharge from the battery and let the solar top off the battery as you are using it because this will ensure you have a smooth and continuous output.

Powerwerx MPPT-300-14.6, DC-to-DC Solar Charger Controller for Bioenno

Rated at 300 watts, the MPPT-300-14.6 solar controller is designed for charging Bioenno 12V type LifePO4 batteries. Input DC range from 20-50 VDC. Output is a constant 14.6 VDC. Rated at 24 Amps maximum. Smart charge controller design will automatically adjust charging output as required by batteries, no user adjustment needed.
