

# Bionix power assist systems

## Overview

---

Is the Bionx a good pedal assist system?

The BionX has the torque sensor integrated into the motor axle. The BionX patented torque sensor is known to be one of the best in the industry. Also the BionX software is spot on. This all equates to a really fine pedal assist experience. The BionX does a terrific job of blending electric assist with your pedaling power.

How does The BionX electric bike kit work?

The BionX electric bike kit also offers a lot of choice when it comes to power levels. You use the handlebar-mounted console to choose level of assist. It offers four levels of proportional torque assist via a motor built into the hub of the rear wheel, so that you can use as much (or as little) assistance as you like.

Does BionX have a rear wheel?

The BionX motor is supplied already laced into a rear wheel (BionX does not do front-wheel drive). Wheel sizes are 20, 24, 26 inch, and 700 cc. Here is a video about BionX electric bike kits: The BionX electric bike kits are best suited to hybrid bikes, but are seen on an incredible variety of bikes these days.

How much does a BionX motor cost?

You can spend \$1,700 on a BionX kit, and \$700 on a new hardtail suspension bike, and for \$2,400 you will have an electric bike that is probably higher quality than most electric bikes on the market now for the same price. The BionX Motor.

Does BionX pl 250 have regenerative braking?

BionX Reviews Offers regenerative braking, pedal assist and throttle mode. Can be a hassle to install If you've got a lightweight bike and want to electrify

it, the BionX PL 250 is one of your best options. This kit works very well for folding bikes and recumbents because of its versatile mounting options.

Can a BionX electric bike be retrofitted?

The high quality BionX electric bike kits can be retrofitted to almost any bike, turning an ordinary bike into an electric bike in less than an hour! The BionX motor is supplied already laced into a rear wheel (BionX does not do front-wheel drive). Wheel sizes are 20, 24, 26 inch, and 700 cc. Here is a video about BionX electric bike kits:

### PAS Options

Scale Factor: This setting determines by how much the motor power multiplies the human power at the max assist setting. For typical systems a max of 3 to 4 times is about right, allowing motor powers of ~800 watts when the rider is putting in 200 watts.
