

Bmw m4 lithium ion battery

Overview

Yes, BMW uses lithium-ion batteries in some of its vehicles, including the M4 GTS. Lithium-ion batteries are lighter and more powerful than lead-acid batteries, making them a popular choice for high-performance vehicles. However, they are also more expensive and require special handling and disposal procedures. What is a BMW lithium ion battery?

- The battery life is about double that of a traditional lead-acid battery;
- They're safe - lithium iron phosphate cells (LiFePO₄) generally have a lower hazard potential than other lithium-based batteries. BMW Lithium-ion batteries are easily distinguished from AGM or lead-acid batteries thanks to a few key traits (Figure 2):.

Is MY BMW M3/M4 running low on battery?

Is your M3/M4 running low on battery or not holding charge, replace it with the Genuine BMW 69AH Lithium-ion Battery to avoid disappointment! Original BMW parts and accessories guarantee the highest quality and safety. All original parts are tailored to your vehicle and comes with a two year warranty.

When did BMW start offering lithium-ion batteries?

BMW started offering lithium-ion batteries in its F80 M3 and F82 M4 in early 2014. Lithium-ion batteries didn't gain a lot of attention and have "flown under the radar" in the few years since. Customers likely don't know which type of battery they have, and technicians likely won't know either without learning how to identify them.

Why does BMW use lithium-ion batteries in the F80 M3 & F82 M4?

It needed to weigh the same, if not less, than other batteries so that it wouldn't negatively affect the sporty drivability for which the brand is known. So, BMW started offering lithium-ion batteries in its F80 M3 and F82 M4 in early 2014. These batteries didn't gain a lot of attention and have "flown under the radar" in the few years since.

Which battery is best for a F8x / M3/M4?

F8x and onward M3/M4 have Li batteries (which is actually the single largest item in terms of weight reduction versus E9x too, saves about 30lbs. of course it comes at a large increase in cost but also a much longer service life if properly charged). An antigravity Li or PowerTex would beat cheaper Li option.

Which battery charger should I use on my BMW Bue?

BMW recommends the use of one of the following chargers: BMW states that you must use the charging points in the engine compartment to prevent the BUE from malfunctioning. Existing chargers which are designed for lead-acid or AGM batteries will generate a charging voltage that is too high for the lithium-ion battery.
