

Boem offshore renewable energy

Boem offshore renewable energy

BSEE and BOEM Formalize Offshore Renewable ...

WASHINGTON - The U.S. Department of the Interior's Bureau of Safety and Environmental Enforcement (BSEE) and Bureau of Ocean Energy Management (BOEM) agreed to a framework for coordination in regulating renewable ...

[California Offshore Wind PEIS](#)

On December 19, 2023, the Bureau of Ocean Energy Management (BOEM) announced a Notice of Intent (NOI) to prepare a Programmatic Environmental Impact Statement (PEIS), which will analyze potential impacts of Federal offshore wind energy development activities on the five offshore wind lease areas off California's central and northern coast.

Gulf of Mexico (GOM) Intergovernmental Renewable Energy ...

Background and Purpose BOEM held its fifth Gulf of Mexico Intergovernmental Renewable Energy Task Force meeting on April 18, 2024. Established in 2021, the Task Force is a partnership between federal, state, and local agencies and Tribal governments tasked

Renewable Energy Lighting and Marking Guidelines Released

In support of the Biden administration's goal to tackle climate change and promote offshore renewable energy production, BOEM has posted its final guidelines for lighting and marking of

structures supporting offshore wind energy projects.

Alaska's Wind, Wave, Tidal Resources Could Help ...

Their new report, "Feasibility Study for Renewable Energy Technologies in Alaska Offshore Waters," was conducted for the Bureau of Ocean Energy Management (BOEM) to evaluate the feasibility of ocean ...

Oregon Activities

Learn how BOEM and NOAA use a multi-phase, public process to tackle the complicated task of identifying potential areas for offshore renewable energy development. How Did We Get Here? This Proposed Sale Notice (PSN) reflects a multi-year planning process

Oregon Wind Energy Areas

Web Story - BOEM Offers First Renewable Energy Research Lease in Federal Offshore Waters Along the U.S. West Coast (01/19/2021) Call for Information and Nominations Oregon Call for Information and Nominations

[Morro Bay Wind Energy Area](#)

BOEM's renewable energy process includes a phased approach to environmental review. One NEPA analysis is prepared at the lease sale stage, such as this Humboldt EA. There is another NEPA analysis done at the ...

Renewable Energy Research

Overview The Office of Renewable Energy Programs (OREP) oversees the development of offshore renewable energy projects on the Outer Continental Shelf (OCS), which have the potential to make significant contributions to our nation's energy portfolio.

Guidance Portal

Guidelines for Submission of Geospatial Data for Offshore Renewable Energy Development
09-27-2023 09-28-2023 JOINT NTL No. 2023-N03
Spatial Data The joint BOEM-BSEE NTL provides information and guidance for all submissions of geospatial data, maps

Historic Preservation Activities and Offshore Renewable Energy

The mission of the Bureau of Ocean Energy Management's Office of Renewable Energy Programs (OREP) is to regulate environmentally-responsible offshore renewable energy development activities. In August of 2014, a team of researchers including BOEM's Office

SouthCoast Wind (formerly Mayflower Wind) , Bureau of Ocean Energy

SouthCoast Wind intends to develop, build, and operate a commercial offshore wind energy facility capable of producing up to 2,400 megawatts (MW) of renewable energy. The project is located within federal waters on the OCS, specifically in BOEM Renewable Energy Lease Area OCS-A 0521, approximately 23 miles offshore Massachusetts.

Renewable Energy

The Pacific Region works closely with states and other stakeholders to facilitate offshore renewable energy development off the West Coast, Hawai'i and Pacific U.S. Territories. The Region also coordinates OCS renewable energy

...

BOEM Homepage , Bureau of Ocean Energy Management

You can put your science and engineering know-how to use at the Bureau of Ocean Energy Management. Join us and help ensure the safe and environmentally responsible development ...

BOEM Proposes to Modify its Offshore Renewable Energy ...

On January 12, 2023, the U.S. Department of the Interior's Bureau of Ocean Energy Management ("BOEM") announced a proposed rule (the "Modernization Rule") to modernize its regulations ...

BOEM completes first offshore wind lease sale in Gulf of Maine

In August, BOEM announced the execution of the nation's first floating offshore wind energy research lease, located offshore Maine. The lease area covers a little under ...

BOEM completes first offshore wind lease sale in Gulf of Maine

In August, BOEM announced the execution of the nation's first floating offshore wind energy research lease, located offshore Maine. The lease area covers a little under 15,000 acres located 28 nautical miles offshore Maine on the U.S. Outer Continental Shelf and

Environmental Consultations and Offshore Renewable Energy

BOEM's mission is to regulate offshore renewable energy development activities in an environmentally responsible way. The Energy Policy Act of 2005 authorized the development of regulations for the Outer Continental Shelf (OCS) Renewable Energy Program.

Maryland Offshore Wind

specifically in BOEM Renewable Energy Lease Area OCS-A 0490, approximately 10 nautical miles offshore Ocean City, Maryland, and approximately 9 nautical miles offshore Sussex County, Delaware. The project includes MarWin, a wind farm of

Overview: Renewable Energy Modernization Rule

(BSEE), oversees responsible development of offshore renewable energy resources on the U.S. Outer Continental Shelf (OCS). On April 24, 2024, the Department released its Renewable Energy Modernization Rule to ensure safe and responsible to a clean

CE UN38.3 MSDS

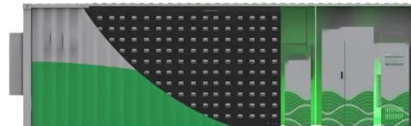

State of Maine Research Lease , Bureau of Ocean Energy ...

Maine Research Lease Area On August 19, 2024, BOEM announced the execution of the nation's first floating offshore wind energy research lease. The lease area covers a little less than 15,000 acres located 28 nautical miles offshore Maine on the U.S. Outer

BOEM Releases Final Environmental Impact Statement for Wind Energy

On August 14, BOEM will hold an offshore wind lease sale for the Central Atlantic, auctioning areas offshore Delaware, Maryland, and Virginia that could generate up to 6.3 gigawatts of clean energy and power up to 2.2 million homes.

BOEM and DOD Sign Agreement to Bolster Interagency ...

2 ???· DOD and BOEM support the Biden-Harris administration's goals to address the climate crisis and create good-paying jobs by deploying 30 gigawatts of offshore wind energy capacity ...

Renewable Energy

In January 2023, regulations governing offshore renewable energy activities - including workplace safety and environmental compliance were officially transferred to BSEE, which clarified BSEE's and BOEM's roles and responsibilities and promotes offshore

Maryland Activities

BOEM coordinates Outer Continental Shelf renewable energy activities offshore Maryland with its federal, state, local, and tribal government partners through its Intergovernmental Renewable Energy Task Force.

Gulf of Mexico Activities

On August 29, 2023, BOEM held the first-ever offshore wind energy auction for the Gulf of Mexico region, resulting in one lease area receiving a high bid of \$5.6 million. RWE Offshore US Gulf, LLC was the winner of the Lake Charles Lease Area, which has the

CE UN38.3 MSDS

Survey Guidelines For Renewable Energy Development

Before BOEM will approve the siting of a facility, structure, or cable proposed for a renewable energy project on the Outer Continental Shelf (OCS), an applicant must submit with its Site Assessment Plan (SAP), Construction and Operations Plan (COP), or General Activities Plan(GAP), and as applic

Renewable Energy Research Completed Studies

Atlantic Science Year in Review 2022 This year in review presents the studies completed in 2022 in support of BOEM's Offshore Renewable Energy Program along the Atlantic coast. The studies represent a broad spectrum of research and monitoring to address a

California Offshore Wind Programmatic Environmental

Welcome to the California Offshore Wind Draft Programmatic Environmental Impact Statement (PEIS) Virtual Meeting Room. Your participation is an essential part of BOEM's renewable energy program and environmental review process. ...

BOEM and DOD Sign Agreement to Bolster Interagency ...

ATLANTIC CITY, NJ-- As part of the Biden-Harris administration's commitment to expand offshore wind opportunities and advance an all-of-government approach to address the climate crisis, the Bureau of Ocean Energy Management (BOEM) today announced a Memorandum of Understanding (MOU) with the Department of Defense (DOD) to support the ...

Renewable Energy EFH Consultations & Guidance

BOEM consults with NMFS on EFH for reasonably foreseeable renewable energy-related activities on the Gulf of Mexico OCS, such as the issuance of commercial and/or research wind energy lease(s) and granting Rights-of-Use Easement and Rights-of-Way in support of offshore wind energy developments.
