

Bosch power steering system

Application scenarios of energy storage battery products

Overview

The electric power steering system enables highly automated driving and meets the highest safety standards.

For connected mobility EPS is linked to the vehicle control unit as well as additional components. This linking provides improved safety.

With the new modular built steering control unit (control unit with an electro motor) the EPS supports all driver assistance functions and autonomous.

The Electric Power Steering System with Belt Drive Servo Unit controls and assists the steering for mid-size vehicles, SUVs, transporters and even pick-up trucks with off-road capability. The.

The EPS controls and assists with the support of an intelligent electric motor the vehicle steering. Based on the steering signal from the torque sensor, the control unit calculates the optimal.

Does Bosch offer electric power steering?

Bosch offers a comprehensive portfolio for the steering of medium and heavy commercial vehicles, ranging from essential individual components to complete systems. The electric power steering system enables highly automated driving and meets the highest safety standards.

What is Bosch power steering software?

Software developed by Bosch allows the electric power steering system to be programmed to the customer's own requirements. As such, a steering system with the same hardware components can be adapted for various types of application. 3 1 2 3 4 5 6 7.

What types of power steering gears does Bosch offer?

Bosch range offers both electric and mechanical pumps. Bosch power steering gears designed for an identical replacement of the original equipment. Range consisting from classic rack and pinion to the state of the art electric and active steering systems.

What is an electric power steering system servo unit?

The Electric Power Steering System Servo Unit on a Second Pinion controls and assists the vehicle steering from compact vehicles to SUVs. The Electric Power Steering Column controls and assists the steering for vehicles up to the mid-size class.

What is servoelectric® electric power steering?

Task The Servoelectric® electric power steering system controls and assists the vehicle steering with the aid of an electronically controlled electric motor. Bosch developed Servoelectric® with the servo unit on the steering column specifically for vehicles with lower steering effort.

What is Bosch servoelectric?

Bosch Servoelectric is an electric power steering system that controls and assists the vehicle steering with the aid of an electronically controlled electric motor. Servo unit on a second pinion provides the ideal electric power steering solution for mid-sized vehicles.

Bosch power steering system

LFP12V100

Bosch ServoE Electric Power-Assisted Steering System

The ServoE is a fully electric steering system for automated driving functions up to SAE level 4 based on a redundant design. The steering system is based on a modular construction kit and consists of the proven ball-and-nut technology combined with two electronic SCUs (Steering Control Units) and worm gear transmissions.

Steering Control Unit

The Electric Power Steering System with Belt Drive Servo Unit controls and assists the steering for mid-size vehicles, SUVs, transporters and even pick-up trucks with off-road capability. Read more [{{bigCurrentPage}}](#) / [{{numPages}}](#)

Electric Power Steering Systems: The now and the future

Figure 1 Electric Power Steering system types
The Electric Power Steering with servo unit on the steering column (EPSc) controls and assists the steering for vehicles up to the lower mid-size class, while the EPS Single Pinion Servo Unit (EPSp) can cover the mid-sized class.
