

# **Bose acoustimass 10 series ii speaker system no power cable**

## Overview

---

Here's the speaker wire that comes with the Bose Acoustimass 10 surround system. For the front three satellite speakers (the center, left and right speakers), Bose includes three 20-ft front speake.

The speaker wire that comes with the Bose Acousticmass 10 has a 16 gauge (AWG). This means the included cables have a diameter of 1.3mm. The lower the gauge, the thicker the cable is. See my speaker gauge wire.

If you need to extend a speaker cable, splicing is a great method to add some extra inches while using the existing cable. For the Bose Acoustimass IV and below, it may be easier to get a brand new speaker cable with.

Speaker wire usually splits into two wire pairs, one negative and one positive. This is so a complete circuit can be formed between the powered module and the speaker.

If parts of your speaker wire are damaged (for example, your pet may have chewed on the cable), it's a good idea to replace the wire. However, it is possible to repair the speaker wire. The first method is replacing the insulati.
