

Bottom photovoltaic power station

Overview

Project Fortress (formerly Cleve Hill Solar Farm) is a photovoltaic power station under construction on the Graveney marshes between Faversham and Whitstable, Kent in the UK. Once operational, it will be the largest solar farm in the UK, generating 373 MW of electricity from 900 acres (360 ha) of vertical solar panels.

The solar farm was initially developed in partnership by Hive Energy and under the name Cleve Hill Solar Farm. It was acquired by Quinbrook Infrastructure Partners in October 2021 and renamed Project.

A photovoltaic power station, also known as a solar park, solar farm, or solar power plant, is a large-scale (PV system) designed for the supply of . They are different from most building-mounted and other decentralized because they supply power at the level, rather than to a local user or users. Utility-scale solar i.
