

Buy house solar panels

Overview

Can you buy a home with solar panels?

Once you own a home's solar panels, you'll be responsible for upkeep, and the home purchase price will be higher. However, there won't be any tricky ownership issues. If the seller financed their solar panels through a loan, you can transfer the loan to your name during the home purchase.

Should you buy a solar home if you're not the original owner?

Solar will save almost all homeowners money, even if you're not the original owner. You might encounter one of four solar home scenarios when you're shopping for a house: fully-owned solar panels, leased solar panels, solar panels purchased with a solar loan, and PACE (Property Assessed Clean Energy) financed solar panels.

Should you buy a home with rooftop solar?

When buying a house with rooftop solar panels, systems that were paid for outright and owned by the current homeowner are the easiest to deal with and the most cost-effective. Here is what to know in each scenario for buying a house with existing solar panels.

Where can I buy solar panels?

Many businesses specialize in selling and installing solar panels for homes. Search online to locate solar panel suppliers and installers in your area. You can start with CNET's best list of solar panel companies. You can even shop for solar panels at major home goods stores like Home Depot.

Should you buy a solar-powered home?

Buying a solar-powered home can jumpstart your clean energy transition, joining millions of other American households that are powering their lives with sunshine. See more solar energy resources for consumers and learn how solar works.

Can you buy a home with leased solar panels?

However, there won't be any tricky ownership issues. If the seller financed their solar panels through a loan, you can transfer the loan to your name during the home purchase. You'd need to pay off the remainder of the loan, but you'd still own the panels once you buy the home. It is possible to buy a home with leased solar panels.
