

Buying vs leasing solar system

ESS

Overview

What is the difference between buying and leasing a solar system?

The main difference between buying and leasing a solar system is who owns the system. When you buy solar panels, whether it be with cash or through a solar loan, you are the owner of the solar panels. With a solar lease or solar power purchase agreement (solar PPA), you don't have to pay any upfront costs to install solar panels on your roof.

Should I buy or lease solar panels?

Unless you are not eligible for the federal solar tax credit and other local rebates, you do not have the upfront cash, or you do not qualify for a solar loan, it's always better to buy your solar panels. What is the difference between buying and leasing a solar panel system?

.

Can you sell a solar system if you leased?

Solar lease: If you leased your solar system, there are two main ways you can handle the lease when selling your house. Buy out the remainder of the lease: When buying out your lease, you can either have the panels removed from your roof or keep them there and sell the system as part of the property.

Should you lease a residential solar system?

The steep up-front costs for a residential solar system can make a leasing company's sales pitch sound pretty appealing: Pay little or nothing and save hundreds of dollars per year on average. (The premise is that you save because the combination of your lease payment and your electric bill is less than what you currently pay for power.).

Do solar leases cost the same a month?

Solar leases also don't cost the same from month to month, making it more

difficult to keep the rest of your finances in order. Many solar leases also have price escalators, which are planned increases in your monthly payments over the lifetime of the lease.

How does a solar lease work?

If you go the route of a solar lease, the system that is installed is owned by either the solar company or another third party. Basically, you pay to rent the system. Monthly payments are based on the estimated electricity production of the panels. Contracts are generally for 20 to 25 years. Power purchase agreements are often confused with leases.
