

Can coin-operated lockers be used

ESS

Overview

How can coin operated lockers be used?

Users must insert a pound coin or token into the lock, in order to secure the locker and extract a key. How to use a coin locker?

Using a coin locker is a breeze. The price of the chosen locker will always be indicated on it. For the oldest coin lockers, simply place your belongings in it, insert the coins (only 100 yen coins) in the slot provided, close the door, and turn and remove the key, which you have to keep with you.

Can I use a pound coin in a locker?

All of our coin locks are multi-purpose, meaning they will accept pound coins and even old-style pound coins. They can also be made to operate with a comprehensive range of other coins such as euros or tokens. Coin retain or Coin return lockers?

There are two different mechanisms in our coin-operated locker locks for you to choose from.

Where can I use a coin-operated locker?

We have a huge range of lockers here at Workplace Products. These coin-operated lockers are some of our most popular for use in many locations such as gyms, fitness centres, spas and swimming pools. Often, the need for a coin encourages users to take more care of their key and the locker compartment they use.

How do coin lockers work?

For the oldest coin lockers, simply place your belongings in it, insert the coins (only 100 yen coins) in the slot provided, close the door, and turn and remove the key, which you have to keep with you. The more modern coin lockers work a little differently: everything is done via a touch screen situated in the middle of the lockers.

What locks do you use for a coin return locker?

Our coin return lockers are fitted with Lowe & Fletcher locks which will accept new and old style £1 coins. The new £1 coins will be introduced in March 2017 which will replace the old circle style £1 coin. These locks will return the coins when the door is opened by the user, this offers simple operation for multiple users.

How to open a keyless Coin Locker?

1. Check locker number, insert key all the way in. 2. Insert excess fee (in 100-yen coins) as indicated above keyhole. 3. Hold door, turn key to the right, and open. With keyless coin lockers, the touch panel is often available in English, Chinese, and Korean in addition to Japanese. 1. Select “Deposit” (入金) on the touch panel.
