Can a car battery be upgraded to lithium ion one?

Upgrading car battery to Lithium-Ion one. Possible?

: r/batteries For questions, news, and discussion about batteries, cells, chargers, charger/inverters, power banks and UPSs. Upgrading car battery to Lithium-Ion one.

Why are lithium batteries not good for starting?

Charging them in sub-freezing temperatures can cause lithium plating, a process that will cause a loss of battery capacity and also cause short circuits, causing permanent damage to the battery. Why Aren't Lithium Batteries Good for Starting?

The issue isn't necessarily with the power output of the batteries.

What voltage does a lithium ion battery output?

The car-specific lithium-ion batteries have a built-in charger / BMS that helps to translate into the voltages that you would typically get from a car's charging system to those that are appropriate for lithium-ion. However, at least in my case, the battery was specifically rated to 14.4V and my car occasionally outputs up to 15V.

Will antigravity make lithium-ion starter batteries available in high-end cars?

In recent years, some automakers have started to make lithium-ion starter batteries available in their vehicles, but the batteries have largely been limited to expensive optional offerings in high-end sports cars from companies like Porsche and McLaren. Antigravity wants to change that.
