

Can you sell used solar panels

Overview

The first step in your assessment to determine whether to resell or recycle used solar panels is to conduct a hardware audit. This step should ideally take place before decommissioning; however, you can still complete a thorough audit after the fact as well. While the PV system is still connected, inspect and test the.

Once you've completed your hardware audit, the next step is to sort your solar panels into two categories - resale versus recycling. Use the following chart to determine which modules fit each category. [Download](#).

Now that you've sorted out which panels to resell versus recycle, your next steps are to prepare the functioning panels for remarketing and arrange delivery to a recycling partner for end-of-life panels. For resale.

Can you sell used solar panels
