Overview

Who is NEPSI?

NEPSI is the leading global provider of medium-voltage metal-enclosed power capacitor banks and harmonic filter banks for use on electric power systems. Founded in 1995, the New York based company has grown to be the world's market leader and most trusted name for the supply of. [read more].

What does NEPSI stand for?

NEPSI | 1,223 followers on LinkedIn. The World's Leading Supplier of Medium-Voltage Metal-Enclosed Reactive Power Solutions | Northeast Power Systems, Inc (NEPSI) is a global provider of medium-voltage reactive compensation systems including metal-enclosed capacitor banks and harmonic filter banks.

What types of capacitors does NEPSI manufacture?

NEPSI manufactures medium-voltage, metal-enclosed power capacitor banks and harmonic filter banks.

What are NEPSI reactive power systems?

NEPSI's reactive power systems are designed for 50/60 Hertz power systems, come in voltage ratings from 2.4kV through 38kV, impulse withstand ratings of 60kV to 200kV, and individual equipment reactive power ratings to 75 MVAR and up.

Why should you choose NEPSI?

NEPSI has a history of innovation and creation, and has revolutionized the "metal-enclosed" industry to include very large, pre-assembled and tested reactive power banks in ratings that were once not thought possible in the metal-enclosed configuration.

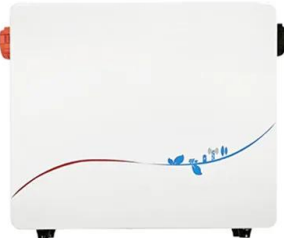

Is NEPSI certified?

NEPSI's equipment is built on sound engineering principles in accordance with Canadian, USA, ANSI, IEEE, and IEC standards. NEPSI is third party certified to ISO 9001:2015, and factory certified to label equipment in accordance with IEEE C37.20.3-2001 and C22.2.
