

China Sodium Energy Storage New Energy Construction Project

Overview

China is embarking on a pioneering large-scale energy storage project utilizing sodium-ion technology, set to become the largest of its kind worldwide. What is Datang Hubei sodium ion new energy storage power station?

The project represents the first phase of the Datang Hubei Sodium Ion New Energy Storage Power Station, which consists of 42 battery energy storage containers and 21 sets of boost converters. It uses 185 ampere-hour large-capacity sodium-ion batteries supplied by China's HiNa Battery Technology and is equipped with a 110 kV transformer station.

Where is China's first sodium-ion battery energy storage station?

China's first major sodium-ion battery energy storage station is now online, according to state-owned utility China Southern Power Grid Energy Storage. The Fulin Sodium-ion Battery Energy Storage Station entered operation on May 11 in Nanning, the capital of the Guangxi Zhuang autonomous region in southern China.

Can sodium-ion battery energy storage be reduced by 20-30%?

Chen Man, a senior engineer at China Southern Power Grid, said [via the South China Morning Post] that once sodium-ion battery energy storage enters the stage of large-scale development, its cost can be reduced by 20-30%. He continued:.

Where is China's 10 MWh sodium-ion battery storage station located?

The 10-MWh sodium-ion battery storage station was put into operation on May 11 in Nanning, Guangxi in southwestern China, China Southern Power Grid Energy Storage, the energy storage division of China Southern Power Grid, said on May 11.

Where is a 100 MWh energy storage station in China?

(A 100 MWh-scale energy storage station using sodium-ion batteries went into operation on June 30, 2024 in Hubei, central China. Image credit: Hina Battery) China has seen another energy storage project using sodium-ion batteries go into operation, as the new batteries begin to gain wider use in energy storage.

What is Sineng electric's 50 mw/100 MWh sodium-ion battery energy storage system?

Sineng Electric's 50 MW/100 MWh sodium-ion battery energy storage system (BESS) project in China's Hubei province is the first phase of a larger plan that will eventually reach 100 MW/200 MWh. The initial capacity has already been connected to the grid and can power around 12,000 households for an entire day.
