

Chloride power systems

GRADE A BATTERY

LiFepo4 battery will not burn when overcharged over discharged, overcurrent or short circuit and can withstand high temperatures without decomposition.

Overview

Chloride is a global company that specializes in the design, production, and maintenance of industrial (UPS) systems to ensure a reliable power supply for critical equipment across multiple industries. Formerly listed on the and a constituent of index, the company has become privately-owned since 2021.

What makes chloride a great power supply company?

From its early days as a battery manufacturer to its current position as one of the global leaders in UPS systems, Chloride has always been at the cutting edge of power supply solutions. The company looks forward to continued success in meeting the power needs of the world's industries for many years to come.

What does chloride do?

Providing the certainty of continuity that safeguards people and protects critical assets. Chloride is a global leader in the design, manufacture and servicing of industrial UPS systems that secure power supply for the critical industries that power the world.

Who is chloride?

Chloride is a global leader in the design, manufacture and servicing of industrial UPS systems that secure power supply for the critical industries that power the world. From energy producers to transport providers, our technologies ensure what can't fail won't fail, and we can all continue to live and work without interruption. Get to know us.

What are chloride® solutions?

Chloride® solutions guarantee a permanent power supply to the most sensitive equipment throughout the value chain such as Hydrogen leak detection systems, electrolyzer control and command systems, remote monitoring systems, transformer substations for offshore wind turbines, SCADA systems, control of hydrogen transport in pipelines.

Who is chloride electrical?

Founded in 1891, the organization began as Chloride Electrical, a company dedicated to designing and manufacturing batteries. Chloride acquired Coredel in 1978, bringing 30 years of experience in the uninterruptible power supply industry into the organization, and setting the path Chloride has followed since.

What makes chloride a leader in the uninterruptible power supply market?

Today, Chloride has achieved its goal of becoming a market leader in the Uninterruptible Power Supply marketplace for mission-critical industrial applications. Our story is one of strategic acquisitions combined with product innovations. Chloride specialises in the protection of mission-critical infrastructure.

Chloride power systems

Chloride CP70Z

Chloride® CP70Z is an industry-leading uninterruptible power supply (UPS) system range that offers maximized power availability for critical process applications. It makes it a system of ...
