

Clover system connecting power cord

Overview

How do I charge my Clover?

Attach the power cord to the power brick and plug the power cord into a power source. Place the device on the charging cradle. If it's properly connected, a battery icon will briefly appear on the screen. While it charges, press and hold the power button until the Clover logo appears on the screen.

How do I Reset my Clover flex?

1. Disconnect your power by removing the device from its charging cradle or unplugging the power cord.
2. Hold the power button for 40 seconds before releasing it.
3. Press the power button again until you see the Clover logo on the screen.
4. Place the Flex on its charging cradle or connect the power cord back to the device.

How do I Turn Off my Clover flex?

Turn on the device by pressing and holding the power button until you see the Clover logo. Turn off the device by pressing and holding the power button. Set the device in sleep mode or wake it up by pressing and immediately releasing the power button. Log in to your Flex with your fingerprint.

How do I install a micro SIM card on my Clover flex?

Page 7 Set Up your Clover Flex A micro SIM card may be pre-installed in the device. See page 9 for instructions on how to replace the SIM. Plug the power brick into the charging cradle and press the cord into the rubber base so that it is flush on the counter.

How do I use a clover phone?

Remove the protective plastic film from the front display glass. Switch on the device by pressing the power button on the right side until the Clover logo appears. On the display, tap to choose your language and then tap Next. Mobile networks use the installed SIM card and your cellular phone

connection.

How do I use the Clover® travel kit Power Charger?

You can use the USB Type-C connector port with the Clover® travel kit power charger (available separately). You can use the employees app to add, edit and delete employee profiles, including different permission levels for different staff roles.
