

Colin Photovoltaic Inverter Password

Overview

How do I unlock my inverter if I forgot the password?

If you have forgotten the password for the inverter, you can unlock the inverter with a personal unlocking key (PUK). For each inverter, one PUK is available for each user group (user and installer). You can request the PUK at our SMA Service Line. With the PUK you can unlock the inverter via Sunny Explorer and then assign a new password.

How do I unlock a solar inverter?

If you have forgotten the password for the inverter, you can unlock the inverter with a Personal Unlocking Key (PUK). For each inverter, there is one PUK for each user group (User and Installer). Tip: With PV systems in Sunny Portal, you can also assign a new password via Sunny Portal for the user group Installer.

How do I change the password for the inverter user interface?

When you open the inverter user interface, you are prompted to enter the password for the user group "User." Select the language and enter the password for the user group "User" twice. Compliance with the new password rules is checked (five green check marks). Press Save. You are then prompted to enter the password for the user group "Installer."

Why do I need a new password for my Sunny inverter?

This new password must therefore be used for establishing a direct connection to the inverter. If no SMA data logger has been installed in the system or no Webconnect data communication with Sunny Portal is used, the system password must be assigned either with the Sunny Explorer software or via the inverter user interface.

How do I assign a new password for a PV system?

Tip: With PV systems in Sunny Portal, you can also assign a new password via

Sunny Portal for the user group Installer. The password for the user group Installer is the same as the system password in Sunny Portal. Request PUK (application form available at).

Why can't I access my inverter?

The inverter (s) can no longer be accessed (displayed with a lock symbol). The plant/system password for the inverter (s) has been forgotten. A forgotten system password can be enabled with a PUK (Personal Unlocking Key). For each inverter, one PUK per user group respectively is required. With 1 PUK, 1 inverter can be activated.

Colin Photovoltaic Inverter Password

[SMA PUK - How to Regain Access to Your Data](#)

In order to best protect against unauthorized access, communication with the PV system via Bluetooth® or Speedwire is password-protected. If the password is lost, access must be reactivated with a PUK ...

[Colin Schauder , IEEE Xplore Author Details](#)

Colin Schauder (M 1980) received the B.Sc. (1972) and Ph.D. (1978) degrees in Electrical Engineering from the University of Cape Town, South Africa. His work experience includes 5 ...

Active/reactive power control of photovoltaic grid-tied inverters ...

It consists of multiple PV strings, dc-dc converters and a central grid-connected inverter. In this study, a dc-dc boost converter is used in each PV string and a 3L-NPC ...

A Temporary Overvoltages Mitigation Strategy for Grid ...

In this paper, photovoltaic (PV) grid-connected inverter which is the core device in PV grid-connected system has been in depth research. The current tracking control method ...

Power One AURORA PVI-OUTD-US Series Installation And

Page 1 © AURORA Photovoltaic Inverters INSTALLATION AND OPERATOR'S MANUAL Note: This document contains proprietary information of Power-One, Inc. The contents of this ...
