## Overview

---

Can I install my own solar panels in Jacksonville Florida?

Yes, you can install your own solar panels in Jacksonville, Florida. However, it is recommended that you have a professional solar installer do the job for you, despite the state's great solar incentives.

How much does solar installation cost in Jacksonville?

The cost of installing solar panels in Jacksonville can vary based on the size and type of system. The average cost of a 5 kilowatt (kW) system is \$13,,500. This price includes the cost of materials, labor, and permits. The average payback period for a 5kW system is 7-8 years.

Is solar energy a viable option in Jacksonville Florida?

Solar energy is a viable option for many homeowners and businesses in Jacksonville, Florida. Solar power is an environmentally friendly source of electricity that can help to reduce your monthly electric bill, as well as your carbon footprint.

Are solar panels a good investment in Jacksonville?

Solar panels have become a good investment for homeowners in Jacksonville due to the significant drop in installation costs and the availability of the state's solar incentives. Homeowners can save money on their electric bills and contribute to the environment.

Why should you choose solar Jacksonville?

Solar power is a clean and renewable resource that can help reduce your carbon footprint. Solar Jacksonville can help you design and install a custom solar power system that will meet your specific needs and save you money on your energy bills.

Can Florida Power Services design a commercial solar system?

Florida Power Services can design and implement a commercial solar installation that will allow your company to reduce or eliminate energy company dependence. We have extensive experience designing and installing all types of high quality commercial solar systems.
