Does your fridge need a backup power source?

A backup power source can ensure you have enough power to keep your fridge going for hours — or even days — without on-grid electricity. EcoFlow's Whole Home Backup Power Solution can give you peace of mind. Your food will stay fresh, and all your essential electrical needs will be covered, even during extended outages.

How many kWh does a battery backup system store?

Comparatively, partial-home battery backup systems usually store around 10 to 15 kWh. Given that power outages are infrequent in most parts of the country, a partial-home battery backup system is generally all you'll need. But, if your utility isn't always reliable for power, whole-home battery backup may be the way to go.

How do I choose a backup power system?

Select backup power with enough capacity to power cooling, refrigeration, and other critical loads: Standard portable generator, portable inverter generator, permanently installed standby generator, permanently installed battery

backup system, portable battery backup, or the battery in an electric vehicle.
