

Cooper power systems Icr 5200

Overview

What is a LCR switch?

Eaton's RFN LCR switch family (LCR-6200, LCR-6600, LCR-6700) utilizes the radio frequency (RF) mesh network communications to combine the speed and reliability of Eaton RF Mesh Network capabilities with advanced load control functionality using robust group addressing and TrueCycle® smart load control algorithms.

What is the purpose of the LCR 6200 RFN?

The LCR 6200 RFN is used to control Systems' Radio Frequency (RF) mesh network. Yukon™ master station. Once powered-up, the LCR to the Yukon master station. and local port security. All local port connections and traceability of actions. **WARNING** Dangerous voltages are present.

What is a lcr-6200 RFN switch?

The LCR-6200RFN switch is designed specifically for quick and clean install on HVAC systems. The solution is also used to control strip heat. The single 5 amp relay is used to cycle the HVAC control circuit to reduce the AC demand while maintaining customer comfort. The LCR-6600RFN switch is designed for versatility.

What are LCR load control switches?

The devices also include cold-load pick-up and short cycle protection features for consumer equipment protection. The load control switches can also help support the grid by responding to frequency and voltage problems. These LCR load control switches are offered as part of Eaton's demand response solution.

Are Eaton LCR load control switches authentic?

These LCR load control switches are offered as part of Eaton's demand response solution. **Authenticated:** The product is verified as being authentic;

however, this does not guarantee the condition or fit for purpose of the product. Eaton customers can access software, firmware and additional product documentation at [My.Eaton.com](https://www.eaton.com/MyEaton).

What is a lcr-6600rfn switch?

The single 5 amp relay is used to cycle the HVAC control circuit to reduce the AC demand while maintaining customer comfort. The LCR-6600RFN switch is designed for versatility. It can be delivered with multiple 5 amp and 30 amp relays so that it can control multiple loads with a single LCR switch.
