### [Solar Power Backup Systems in Kenya](#)

A power backup system is a set-up to provide uninterrupted power supply for your household during a blackout from a stored energy source. It's a seamless switchover from your existing solar panels or generator to keep your power ON. The solar panels generate power that will be stored in batteries to safely power your electrical household appliances in case of power outages.

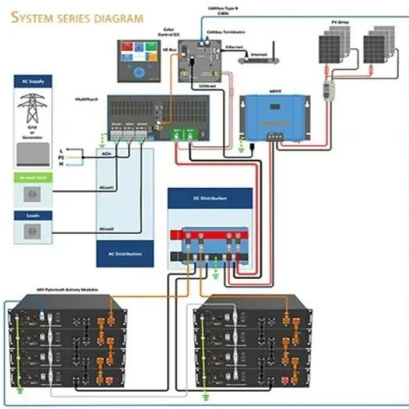

### [Demand for Solar Power Grows in Africa](#)

CP Solar's managing director, Rashmi Shah, said his company has installed 25 megawatts of solar systems in the past six years. "It is a very clean source of energy," he said, and clients are able to recover their initial costs through savings

within the first four years.
