

Crown Solar Power Generation

Overview

Why is GB Energy partnering with the Crown Estate?

Investing in clean power is the route to end the UK's energy insecurity, and GB Energy will be essential in this mission. "The agreement with The Crown Estate will lead to more investment, cleaner power, more energy security, and is a statement of intent that it will be a permanent and transformative institution for our country."

Will GB Energy & Crown Estate help build offshore wind turbines?

The partnership between state-owned GB Energy and the Crown Estate, unveiled by energy secretary Ed Miliband on Thursday, is being touted as a way to accelerate the building of thousands of offshore wind turbines in the UK over the coming years.

Will Great British Energy & the Crown Estate benefit from a new partnership?

The Prime Minister and Energy Secretary today announced a new unprecedented partnership between Great British Energy and The Crown Estate, which has the potential to leverage up to £60 billion of private investment into the UK's drive for energy independence.

How will crown's PV project contribute to corporate stewardship?

The PV project will contribute to Crown's overall goal of stronger corporate stewardship. To initiate this latest effort around responsible solutions, Crown worked with Schneider Electric, the leading adviser in corporate renewable energy procurement and carbon management, on the project selection and VPPA negotiation.

Will GB Energy & Crown Estate get a seabed lease?

The government claimed the partnership would lead to up to 20GW-30GW of new offshore wind developments securing seabed leases by 2030. But this is not a new development — the Crown Estate had already set that target in

November, long before the deal with GB Energy.

What is the Crown Estate doing with offshore wind?

Offshore wind momentum From the first leasing round in 2001, The Crown Estate has supported the development of a world-class offshore wind market, which has grown to become the largest source of renewable electricity in the UK, currently able to power approximately 41% of UK homes.
