

# Current ranking of photovoltaic inverters

## Overview

---

What is the global PV inverter market share?

Global PV inverter shipments grew by 56% to 536 gigawatts alternating current (GWac) in 2023, reflecting a strong year for the broader solar industry. The top 10 global PV inverter vendors accounted for 81% of the market, according to Wood Mackenzie's 'Global solar inverter and module-level power electronics market share 2024' report.

How pvbl ranked the top 20 global photovoltaic inverter brands in 2023?

On the first day of the conference, PVBL's annual ranking of the Top 20 Global Photovoltaic Inverter Brands was announced. Preferential policies promoted the inverter market growth in 2023. Most of the major inverter companies won a large amount of orders and expanded their capacity with high shipment volume.

Which solar inverter is best?

The SolarEdge Home Wave Inverter is our top pick. It was the most efficient inverter we looked at, meaning you'll get to use more of the energy your solar panels generate -- less waste means you'll have more power to use around the house. SolarEdge also has strong warranties and a highly rated app. What are solar inverters?

.

What do solar PV inverters need to do in 2024?

Solar PV inverters need to do more than ever before. Solar PV inverters in 2024 must interact with the grid (UL 1741), offer more options to meet rapid shutdown (UL 3741), and ease the inclusion of battery storage.

Who makes the best grid-connect solar inverters?

We review the best grid-connect solar inverters from the worlds leading

manufacturers Fronius, SMA, SolarEdge, Fimer, Sungrow, Huawei, Goodwe and many more to decide who offers the highest quality and most reliable solar string inverters for residential and commercial solar.

Are solar inverters weather rated?

Almost all solar inverters are fully weather-rated and can be safely installed outside. However, like any electrical equipment, solar inverters should be installed in a protected or shaded location to avoid extreme weather and large variations in temperature, which can reduce performance and lifespan.
