

Delete advanced system care power plan

Overview

Follow these steps: Open the Command Prompt as administrator. Run the `powercfg /list` command and it will list all existing power plans in your system along with their GUIDs. Now, you can delete the desired power plan using the following command. `powercfg -delete GUID` When it's done, the selected power plan is deleted and you cannot use it anymore.

How to delete a Power Plan on Windows 11?

In order to delete a Power Plan on a Windows 11 computer, you need to follow the steps mentioned below. Open the Control Panel by searching it out of the Start Menu. Change the Category to Large icons and click on Power Options. Click on Choose or Customize a Power Plan.

How do I delete a custom power plan?

Open Control Panel. Click on Hardware and Sound. Click on Power Options. Select a different power plan option if the one to delete is currently selected. Click the "Change plan settings" option next to the custom power plan. Click the "Delete this plan" option. Click the OK button.

How do I Change my ultimate performance Power Plan?

1 Open the Control Panel (icons view), click/tap on the Power Options icon. If the Ultimate Performance power plan is currently selected as your active plan, then you will need to select (dot) a different plan to be your active plan first. 5 You can now close the "Edit Plan Settings" window if you like.

How do I delete a default Power Plan?

You will need to use Option Two to delete a default power plan instead. 1 Open the Control Panel (icons view), and click/tap on the Power Options icon. If the power plan you want to delete is currently your default active power plan, then you will need to change your default active power plan first.

Can I restore a Power Plan after deleting a plan?

After you delete a plan, you can't restore it unless you had previously exported the power plan to be able import it back when you like. If you want to restore a power plan deleted using this option, you can use option 1 or 2 here.

How do I change a Power Plan in Windows 10?

Select a power plan with the settings you want to start. Under "Plan name," type a descriptive name for the new power scheme. Click the Next button. Using the drop-down menus, select when your computer should turn off the display and when it should go to sleep.
